A Dingo Ate My Math Book

Burkard Polster, Marty Ross, 2017-12-27 A Dingo Ate My Math Book presents ingenious unusual and beautiful nuggets of mathematics with a distinctly Australian flavor It focuses for

example on Australians love of sports and gambling and on Melbourne's iconic mathematically inspired architecture. Written in a playful and humorous style, the book offers mathematical entertainment as well as a glimpse of Australian culture for the mathematically curious of all ages. This collection of engaging stories was extracted from the Maths Masters column that ran from 2007 to 2014 in Australia's Age newspaper. The maths masters in question are Burkard Polster and Marty Ross, two immigrant Aussie mathematicians who each week would write about math in the news, providing a new look at old favorites, mathematical history, quirks of school mathematics, whatever took their fancy. All articles were written for a very general audience with the intention of being as inviting as possible and assuming a minimum of mathematical background.

Teaching Secondary School Mathematics Merrilyn Goos, Colleen Vale, Gloria Stillman, Katie Makar, Sandra Herbert, Vince Geiger, 2020-07-16. Since its first publication, *Teaching Secondary School Mathematics* has established itself as one of the most respected and popular texts for both pre-service and in-service teachers. This new edition has been fully revised and updated to reflect the major changes brought about by the introduction of the Australian Curriculum Mathematics, as well as discussing significant research findings, the evolution of digital teaching and learning technologies, and the implications of changes in education policies and practices. The mathematical proficiencies that now underpin the Australian curriculum, understanding fluency, problem solving, and reasoning, are covered in depth in Part 1, and a new section is devoted to the concept of numeracy. The chapter on digital tools and resources has been significantly expanded to reflect the growing use of these technologies in the classroom, while the importance of assessment is recognised with new material on assessment for learning and as learning, along with a consideration of policy development in this area. Important research findings on common student misconceptions and new and effective approaches for teaching key mathematical skills are covered in detail. As per the first edition, readers will find a practical guide to pedagogical approaches and the planning and enactment of lessons, together with enhanced chapters on teaching effectively for diversity, managing issues of inequality, and developing effective relationships with parents and the community. This book is the essential pedagogical tool for every emerging teacher of secondary school mathematics. The text offers an excellent resource for all of those involved in the preparation of secondary mathematics teachers, with links to research literature, exemplars of classroom practices, and instructional activities that encourage readers to actively examine and critique practices within their own educational settings. Professor Glenda Anthony, Institute of Education, Massey University. A rich and engaging textbook that covers all of the important aspects of learning to become an effective secondary mathematics teacher. The second edition of this text is further enhanced with updated references to the Australian Curriculum, NAPLAN, STEM, current Indigenous social justice, and gender inequity issues, and the place of Australian mathematics curricula on the world stage. Dr Christine Ormond, Senior Lecturer, Edith Cowan University. **Complexity and Simplicity in Science Education** David Geelan, Kim Nichols, Christine V. McDonald, 2022-01-25. This edited volume brings together a broad range of international science education studies focusing

on the interplay of teaching and learning science It recognizes the complexity present in today s education associated with major science related issues faced by society such as climate change diseases and pandemics global conflicts over energy food and water The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow **Primary**
