Narragansett Bay Fishing Report October 2009:

Escape from the Ivory Tower Nancy Baron, 2010-08-13 In this practical and entertaining guide to communicating science Baron explains how to engage your audience and explain why a particular finding matters She explores how to ace your interview promote a paper enter the political fray and use new media to connect with your audience The book includes advice from journalists decision makers new media experts bloggers and some of the thousands of scientists who have participated in her communication workshops Many of the researchers she has worked with have gone on to become well known spokespeople for science related issues Whether you are an absolute beginner or a seasoned veteran looking to hone your skills *Escape From the Ivory Tower* can help make your science understood appreciated and perhaps acted upon *Blue Justice* Svein Jentoft, Ratana Chuenpagdee, Alicia Bugeja Said, Moenieba Isaacs, 2022-03-07 For small scale fisheries around the world the Blue Growth and Blue Economy initiatives may provide sustainable development but only insofar as they align with the global consensus enshrined in the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the context of Food Security and Poverty Eradication If states do nothing to fulfill the promises they made when they endorsed these guidelines in 2014 the Blue Economy will come at a loss for small scale fisheries and further their marginalization in the ocean economy Under the umbrella of Blue Justice this book demonstrates that these risks are real and must be considered as states implement their sustainable ocean development plans These are human rights issues which are embedded into governance principles and institutions and which make a difference for small scale fisheries people in their daily lives In stressing the importance of policies and institutions that build on the experiences of small scale fisheries people in the contexts in which they operate this book draws on case studies of small scale fisheries from countries on all continents to clarify what Blue Justice entails for small scale fisheries and make suggestions for real change Through the Blue Justice paradigm this book flags the relevance of recognizing the potential impact that different factors including the Blue Economy approach could bring to fishing communities their livelihoods cultural traditions and other potential multidimensional conflicts Vulnerability in fishing communities can increase and inequalities can be reinforced at different levels if individuals and community capabilities are not strengthened A first of its kind not to be missed this book is informative purposeful and pertinent in an era of change Silvia Salas CINESTAV Marine Resources Department Mrida Mexico The studies reveal that Blue Justice is a governability issue which requires establishing right institutions that are transdisciplinary integrated participatory and holistic It is implicit from these writings that the SSF Guidelines and Blue Growth initiatives do not form two different discourses and that the implementation of the former would resolve many of the justice issues caused by the latter in favor of small scale fisheries and their communities Oscar Amarasinghe Professor Chancellor Ocean University of Sri Lanka and President Sri Lanka Forum for Small Scale Fisheries SLFSSF **Oceanography and Marine Biology** R. N. Hughes, D. J. Hughes, I. P. Smith, 2013-08-28 Increasing interest in oceanography and marine biology and its relevance to

global environmental issues continues to create a demand for authoritative reviews summarizing recent research Now in its 51st volume *Oceanography and Marine Biology* has addressed this demand for more than 50 years This annual review considers the basics of marine research special topics and emerging new areas Regarding the marine sciences as a unified field the text features contributors who are actively engaged in biological chemical geological and physical aspects of marine science Including color inserts and extensive reference lists this series is essential for researchers and students in all fields of marine science *Fishery Bulletin* ,2013

Submarine Cables and the Oceans L. Carter,2009 There are many things and services in our everyday life that we take for granted and telecommunications is one of them We surf the internet send emails to friends and colleagues abroad talk to family members in foreign countries over the phone book airline seats and make banking transactions without actually realizing and appreciating the sophisticated technology that enables us to do so This report covers the history and nature of cables their special status in international law their interaction with the environment and other ocean users and finally the challenges of the future It is an evidence based synopsis that aims to improve the quality and availability of information to enhance understanding and cooperation between all stakeholders UNEP WCMC in collaboration with the International Cable Protection Committee and UNEP has prepared this new report to provide an objective factual description of the sub marine cable industry and the interaction of submarine telecommunications which route 95% of all international communications traffic with the marine environment This important report seeks to focus and guide deliberations and decision making on the wise conservation and protection of the oceans in concert with their sustainable management and use **Marine**

Conservation: Knowledge, Experience and Tools for Change Shaili Johri,Holly J. Niner,Sophia N. Wassermann,Judith Meyer,2022-03-08 Rebounding Marine Mammal Species and Conservation Recovery Challenges Andrea Bogomolni,

Kristina Cammen,Jennifer Jackman,2025-03-19 Marine mammals have been valued for millennia for their cultural significance and more often their exploitative resource value Many large whale species remain imperilled or are only recently returning from the brink of extinction In contrast recent conservation measures have allowed for the successful rebound and recovery of many cetaceans and pinniped species some to the point of perceived overabundance whether referring to 1 200 Hawaiian monk seals or 7 million harp seals In addition to their continued intrinsic value alive and thriving today we also appreciate the value of marine mammal species to ecosystem health Yet as we grapple with a lack of historical baselines and uncertain ecological and social carrying capacities several conflicts are emerging at the growing interface between humans and marine mammals These conflicts include ship strikes depredation bycatch impacts of ecotourism competition for

resources changing cultural values and political challenges to marine mammal conservation Despite the emergence of theory and application of human dimensions of wildlife in the terrestrial realm the rebound of marine mammals and how we address these conflicts in the coastal and ocean environment are often overlooked when discussing human wildlife conflict issues and solutions This Research Topic aims to increase awareness of these issues to advance the discussion on how we can address these challenges in ocean systems Conflicts with rebounding populations of marine mammals have emerged across diverse ecological sociological economic and political contexts Conflicts often arise from assessing how marine mammals fit into the human world based on the baseline understanding of one s own personal experiences or specific community contexts rather than broader and complex ecosystems understanding or historical context How do we address these emerging complex socio ecological problems related to marine mammals Who defines the problems and how are the problems defined How do we consider often opposing values and interests in the development of solutions and how do we engage diverse stakeholders in decision making processes that shape how we will manage and coexist with marine mammal populations for generations to come How can different disciplines help build the knowledge foundation and strategies necessary to address these challenges

John Paul Jones Joseph F Callo, 2009-03-01 Winner of the Samuel Eliot Morrison Award for Excellence in Naval Literature This fresh look at America s first sea warrior avoids both the hero worship of the past and the recent inaccurate deconstructionist views of John Paul Jones s astonishing life The author goes beyond a narrow naval context to establish Jones as a key player in the American Revolution something not done by previous biographers and explains what drove him to his achievements At the same time Admiral Joseph Callo fully examines Jones s dramatic military achievements including his improbable victory off Flamborough Head in the Continental ship Bonhomme Richard but in the context of the times rather than as stand alone events The book also looks at some interesting but lesser known aspects of Jones s naval career including his relationships with such civilian leaders as Benjamin Franklin How Jones handled those often difficult dealings Callo maintains contributed to the nation s concept of civilian control of the military Suggesting that Jones might well be the first U S apostle of sea power the author also focuses on the fact that Jones was the first serving American naval officer who emphasized the role naval power would play in the rise of the United States as a global power Another neglected aspect of Jones s career that gets attention and analysis is his brief tour in the Russian navy a revealing chapter of his life that has been underreported in the two hundred years since Jones s death Rather than looking at Jones in a rearview mirror Callo illuminates how this unique naval hero is linked to the nation s present and future As a result he gives us a sea saga that tells much about our own lives and times
