*NATO Strategy and Out-Of-Area Operations* School of Advanced Military Studies, 2014-10-25 This book examines the viability of recent NATO out of area operations specifically in Kosovo and Afghanistan It illustrates that the complex decision making bureaucracy of NATO can be a detriment to the capabilities of the alliance and limits the strategic options available to the organization By studying strategy development after the end of the Cold War and leading up to the commitment of NATO to the ISAF it becomes clear that these structures and processes do not easily facilitate the formation of a coherent strategy that meets alliance objectives During times of conflict especially those well outside of alliance boundaries more flexible and adaptable institutional structures are necessary for effective war prosecution Through this approach it becomes apparent that the anticipated new strategic concept must once again adapt the alliance in order to remain relevant in the contemporary security environment

National Security and Defense Policy Handbook NATO's Return to Europe Rebecca R. Moore,Damon Coletta,2017-09-11

NATO s 2010 Strategic Concept officially broadened the alliance s mission beyond collective defense reflecting a peaceful Europe and changes in alliance activities NATO had become an international security facilitator a crisis manager even outside Europe and a liberal democratic club as much as a mutual defense organization However Russia s re entry into great power politics has changed NATO s strategic calculus Russia s aggressive annexation of Crimea in 2014 and its ongoing military support for Ukrainian separatists dramatically altered the strategic environment and called into question the liberal European security order States bordering Russia many of which are now NATO members are worried and the alliance is divided over assessments of Russia s behavior Against the backdrop of Russia s new assertiveness an international group of scholars examines a broad range of issues in the interest of not only explaining recent alliance developments but also making recommendations about critical choices confronting the NATO allies While a renewed emphasis on collective defense is clearly a priority this volume s contributors caution against an overcorrection which would leave the alliance too inwardly focused play into Russia s hand and exacerbate regional fault lines always just below the surface at NATO This volume places rapid fire events in theoretical perspective and will be useful to foreign policy students scholars and practitioners alike

**Fighting for Rights** Tal Dingott Alkopher,2016-04-15 In the light of NATO s humanitarian war in Kosovo is it possible to understand or explain wars as an outcome of perceptions of rights How did rights be they divine rights in the Middle Ages territorial rights in the eighteenth century or human rights today become something that people are willing to fight and die for To answer these questions this book explores the linkage between concepts of rights and the practice of war in the

international arena Alkopher describes how normative structures of rights have shaped different practices of war from medieval to modern times through the lens of social constructivism From the eleventh to the thirteenth century concepts of divine rights and institutionalized practices of the Crusades to the Holy Land fostered the prevailing ideas of international rights and war In the eighteenth century the institutionalization of states rights and territorial wars shaped international conflict This view held until the late twentieth century when the institutionalization of human rights coupled with the emerging practice of humanitarian war particularly NATO s war in Kosovo engendered new norms of international conduct The author concludes that rights have the power to constitute an international order that will be either cooperative or conflictual and the choice of outcome is very much in our hands This book will be essential reading for international relations and political science scholars and students but also philosophers legal and sociological historians and international lawyers
