**Natural Hazards in West**

**and Central Africa** Samuel J. Freeth, Charles O. Ofoegbu, K. Mosto Onuoha, 2013-03-09 Attention to the problems posed by natural hazards in West and Central Africa was brought into sharp focus by the deaths of an estimated 1700 people in the valleys to the north of Lake Nyos in 1986 Prior to that the only well documented major natural catastrophe was the 1983 earthquake which killed at least 275 people in northwestern Guinea Though we would not wish to appear to suggest that the 1939 Accra earthquake which killed 16 people or the Lake Monoun disaster which killed 37 people in 1984 were not significant events for the areas concerned The full horror of the Lake Nyos gas disaster was exacerbated as far as the outside world was concerned by initial uncertainty concerning its cause During the first phase of the investigation there were considerable disagreements between some of the participating groups of scientists Many of these disagreements have now been resolved and it is to be hoped that the contributions in this volume will further help to resolve some of the outstanding uncertainties However although it is important to understand what happened at Lake Nyos in 1986 and why it happened it is more important for the future of that area that further similar disasters should be avoided We can only hope that this volume will help to establish a solid foundation for future research into ways of removing excess gas from the lake **Instability**

Robin G. McInnes, Jenny Jakeways, 2002 During 2000 2001 exceptionally high winter rainfall resulted in major ground instability problems on the Isle of Wight and coincided with the completion of important research on the predicted impacts of climate change on unstable coastal and mountainous areas These proceedings highlight the importance of implementing coastal and landslide management strategies and integrating the research findings into strategic planning and development control policies Geoinformation Technologies for Geo-Cultural Landscapes: European Perspectives Andreas Vassilopoulos, Niki Evelpidou, Oliver Bender, Alenka Krek, 2008-12-04 The focal main objective of the book is to constitute a meaningful linkage among research problems geoinformation methods and corresponding applications The research goals related both to theoretical and practical issues derive from multidisciplinary fields such as archaeology history geography landscape planning environment geoinformation
