- Identify factors that determine physical properties of a liquid
- Define *evaporation* in terms of kinetic energy
- Describe the equilibrium between a liquid and its vapor
- Identify the conditions under which boiling occurs

Vocabulary

- vaporization
- evaporation
- vapor pressure
- boiling point
- normal boiling point

Part A Completion

Use this completion exercise to check your understanding of the concepts and terms that are introduced in this section. Each blank can be completed with a term, short phrase, or number.

Liquids are much 1 than gases. Liquids and solids are known as 2 states of matter. The conversion of a liquid to a gas or vapor is called 3. When a liquid that is not 4 changes to a gas, the process is called evaporation. A liquid evaporates faster when heated; however, evaporation itself is a 5 process. When a partially filled container of liquid is sealed, some of the particles at the 6 of the liquid vaporize. These particles collide with the walls of the container, producing a force called 7. The vapor pressure of a liquid can be determined by a device called a 8. A liquid boils when its 9 equals the external pressure. The normal boiling point of a liquid is the temperature at which the vapor pressure is equal to 10.

Ionic Liquids in Synthesis Peter Wasserscheid,Thomas Welton,2008-06-25 The second completely revised and enlarged edition of what has become the standard reference work in this fascinating field brings together the latest developments supplemented by numerous practical tips providing those working in both research and industry with an indispensable source of information New contributions have been added to reflect the fact that industrial processes are already established and ionic liquids are now commercially available A must for everyone working in the field

Aeronautical Engineering Review ,1957 *Practical Druggist and Pharmaceutical Review of Reviews* Benjamin Lillard,1922 Excitations in a Bose-condensed Liquid Allan Griffin,1993-08-19 This volume gives an up to date systematic account of the microscopic theory of Bose condensed fluids developed since the late 1950s In contrast to the usual phenomenological discussions of superfluid 4He the present treatment is built on the pivotal role of the Bose broken symmetry and a Bose condensate The many body formalism is developed with emphasis on the one and two particle Green s functions and their relation to the density response function These are all coupled together by the Bose broken symmetry which provides the basis for understanding the elementary excitations and response functions in the hydrodynamic and collisionless regions It also explains the difference between excitations in the superfluid and normal phases Chapter 4 gives the first critical assessment of the experimental evidence for a Bose condensate in liquid 4He based on high momentum neutron scattering data

Ayahuasca as Liquid Divinity André van der Braak,2023-05-15 Ayahuasca often yields transformative experiences that merge such familiar categories as the sacred and the secular transcendence and immanence subject and object and the human and the nonhuman However such experiences are interpreted differently by Western and indigenous discourses Using the work of French philosopher Bruno Latour Andr van der Braak asks fundamental ontological questions in

order to reimagine ayahuasca as liquid divinity shifting the focus from ayahuasca experiences to ayahuasca based ritual practices that aim to cultivate relationships with more than human powers described by Latour as beings of transformation and religion Ayahuasca as Liquid Divinity An Ontological Approach describes Santo Daime practices as a contemporary form of theurgy god work as defined by the third century Platonic philosopher and mystagogue Iamblichus Theurgical practices aim at drawing down divine action through ritual procedures using the imagination as an active faculty Van der Braak argues that ayahuasca religiosity is ultimately not about individual recreation or healing or even personal visions but rather about engaging in communal transformative ecodelic practices that let us work as companions of the gods in order to practice solidarity with all sentient beings
