**Jihadism Transformed** Simon Staffell,Akil N. Awan,2016-12-01 Jihadist narratives have evolved dramatically over the past five years driven by momentous events in the Middle East and beyond the death of bin Laden the rise and ultimate

failure of the Arab Spring and most notably the rise of the so called Islamic State For many years al Qaeda pointed to an aspirational future Caliphate as their utopian end goal one which allowed them to justify their violent excesses in the here and now Islamic State turned that aspiration into a dystopic reality and in the process hijacked the jihadist narrative breathing new life into the global Salafi Jihadi movement Despite air strikes from above and local disillusionment from below the new caliphate has stubbornly persisted and has been at the heart of ISIS s growing global appeal This timely collection of essays examines how jihadist narratives have changed globally adapting to these turbulent circumstances Area and thematic specialists consider transitions inside the Middle East and North Africa as well as in South Asia sub Saharan Africa and Europe As these analyses demonstrate the success of the ISIS narrative has been as much about resonance with local contexts as it has been about the appeal of the global idea of a tangible and realised caliphate

Ginty, 2021-04-20 This book lifts the taboo on maladaptation a different driver of environmentally induced migration which shines a light on the negative consequences arising from the solutions to climate change adaptation and mitigation policies Through a systematic analysis and critique of existing mitigation and adaptation policies under the United Nations Framework Convention on Climate Change UNFCCC and international development community and supplemented by a small empirical study in Indonesia this book catalogues how maladaptation is manufactured under existing climate change solutions It posits that customary communities in general and women in particular are disproportionately affected by the dominant market driven logics that underscore current climate change solutions adopted by the UNFCCC The injustice of maladaptation is highlighted as multi faceted and explored using political economic social and ecological lenses and the concept of environmental reintegration is also explored as a possible solution to this issue Further possibilities are then presented in the Afterword as a combination of what the new post neoliberalism conjuncture could potentially look like This
