**Urban Growth in Emerging Economies** Gordon

McGranahan, George Martine, 2014-04-29 Along with globalization urban transitions have been central in the southward shift in economic power towards the newly emerging economies As this book shows however these transitions have not been painless and it is important for the rest of the urbanizing world to learn from the mistakes It examines the role of urbanization and urban growth in the emerging economies taking the BRICS countries Brazil Russia India China and South Africa as case studies Their different approaches towards urbanization have shaped their historical development paths and assisted or constrained their futures Several of the BRICS bear heavy burdens from past failures to accommodate urban growth inclusively and efficiently and many other urbanizing countries in Asia and Africa are in danger of replicating their mistakes The overriding lesson of the book is that cities and nations must anticipate urbanization and accommodate urban growth pro actively so as not to be left with an enduring legacy of inequalities and lost opportunities This book is aimed at students and researchers in urban studies and development studies It will also be of interest to policy advisors concerned with urbanization and the role of cities in a country s development

*Second Rank Cities in Europe* Roberto

Camagni, Roberta Capello, 2017-10-02 Second rank cities are back on the academic scene capturing the interest of scholars with their unexpected recent performance with respect to first rank cities Looking at the data on average urban GDP growth

in 139 European cities since 1996 the relatively strong position of large cities over 1.5 million inhabitants on national growth coincides with the periods of fastest expansion while at times of slowdown second rank cities prevail. Especially in the recent period of economic downturn second rank cities have recorded annual GDP growth rates much less negative than those of capital cities and in some European countries like Austria and Germany all cities have outperformed their capitals. In explaining this phenomenon linking urban dynamics to agglomeration theories seems the most interesting approach. However merely to link agglomeration economies to urban size in order to interpret urban performance is neither convincing nor sufficient and it calls for additional investigation into how agglomeration economies work. This volume claims that interpretation of the current dynamics in European urban systems especially in the western part of Europe would benefit from exploitation of the traditional concept of agglomeration economies. However necessary for this purpose are more in depth considerations on the nature, scope, intensity and causes of agglomeration economies which do not relate their existence solely to urban size. And this is where the main challenge for scholars lies in the interpretation of the missing link between agglomeration economies and urban dynamics. This book was originally published as a special issue of *European Planning Studies*.

**Leveraging Urbanization in South Asia** Peter Ellis, Mark Roberts, 2015-11-13. The number of people in South Asia's cities rose by 130 million between 2000 and 2011 more than the entire population of Japan. This was linked to an improvement in productivity and a reduction in the incidence of extreme poverty. But the region's cities have struggled to cope with the pressure of population growth on land, housing, infrastructure, basic services and the environment. As a result urbanization in South Asia remains underleveraged in its ability to deliver widespread improvements in both prosperity and livability. *Leveraging Urbanization in South Asia* is about the state of South Asia's urbanization and the market and policy failures that have taken the region's urban areas to where they are today and the hard policy actions needed if the region's cities are to leverage urbanization better. This publication provides original empirical and diagnostic analysis of urbanization and related economic trends in the region. It also discusses in detail the key policy areas the most fundamental being urban governance and finance where actions must be taken to make cities more prosperous and livable.

Tourism and Sustainable Development Goals Jarkko Saarinen, 2020-06-29. This comprehensive volume comprises some of the best scholarship on sustainable tourism in recent years demonstrating the rich body of past research that provides a fertile and critical ground for studies on the Sustainable Development Goals (SDGs) by tourism geographers and other social scientists in the future. Since the turn of the 1990s many international development and policy making organisations have perceived the tourism industry with its local and regional connections as a high potential tool for putting sustainable development into practice. The capacity of tourism to work for sustainable development was highlighted in relation to the United Nations SDGs which were adopted in 2015. The SDGs define the agenda for global development to 2030 by addressing pertinent challenges such as poverty, inequality, climate change, environmental degradation and peace and justice. Tourism geographers and allied

disciplines have held strong and long term interest in sustainability issues and their chapters in this collection contribute significantly to this emerging and highly policy relevant research field This book was originally published as an online special issue of the journal *Tourism Geographies*
