Geography Pnovember 2014 Memorandum:

The African Metropolis Toyin Falola, Bisola Falola, 2017-08-07 On a planet where urbanization is rapidly expanding nowhere is the growth more pronounced than in cities of the global South and in particular Africa African metropolises are harbingers of the urban challenges that lie ahead as societies grapple with the fractured social economic and political relations forming within these new often mega cities The African Metropolis integrates geographical and historical perspectives to examine how processes of segregation marginalization resilience and resistance are shaping cities across Africa spanning from Nigeria and Ghana to Kenya Ethiopia and South Africa The chapters pay particular attention to the voices and daily realities of those most vulnerable to urban transformations and to questions such as Who governs Who should the city serve Who has a right to the city And how can the built spaces and contentious legacies of colonialism and prior development regimes be inclusively reconstructed In addition to highlighting critical contemporary debates the book furthers our ability to examine the transformations taking place in cities of the global South providing detailed accounts of local complexities while also generating insights that can scale up and across to similar cities around the world This book will be of interest to students and scholars of African Studies urban development and human geography

HC 369 - Devolution: The Next Five Years and Beyond Great Britain. Parliament. House of Commons. Communities and Local

Government Committee, 2016 The Government has announced a devolution revolution transferring powers and opportunities to local government through a series of devolution deals The Cities and Local Government Devolution Bill gives statutory authority to deals and enables some of the specific reforms the Government wishes to make such as introducing directly elected mayors for combined authorities This inquiry set out to examine the contents of the Bill and in particular whether Greater Manchester's deal is a model for other areas but its scope quickly widened to a review of the way in which devolution in England is proceeding The Committee has identified various aspects of the current approach that it recommends are refined and improved The Committee has found a significant lack of public consultation and engagement at all stages in the devolution process The public should be engaged in the preparation of devolution proposals insofar as possible during the negotiations and once the results of a deal have begun to make an impact and communicated to throughout the process This is particularly the case for health devolution where the systems in place are complex changes are consequently more difficult to understand and the public's response is likely to be more emotional The Committee also believes that the Government's approach to devolution in practice has lacked rigour as to process there are no clear measurable objectives for devolution It suggests various ways in which proper process can be ensured

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this

Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary

Resource Conflicts M. Troy Burnett,2016-09-19 Natural resource and environmental conflicts have long been issues confronting human societies This case based examination of a wide range of natural resource disputes exposes readers to many contemporary examples that offer reasons for both hope and concern The Rwandan genocide the Sudanese civil war and perpetual instability in the Middle East and Africa each of these crises have arguably been instigated and maintained by natural resource disputes China has undertaken a Herculean task to plant hundreds of millions of trees along its margins in an effort to save Beijing from crippling dust storms and halt the expansion of the Gobi desert Will it work and is it worth it These and many other cases of conflict stemming from natural resource or environmental concerns are explained and

debated in this up to date examination of contemporary and ongoing topics The book examines conflicts over precious resources and minerals such as diamonds oil water and fisheries as well as the pursuit of lesser known minerals like Coltan and other rare earth elements important resources in our technological age in remote locations such as Greenland and the Congo Each topic contains an overview and two position essays from different authors thereby providing the reader with highly informative and balanced perspectives Reference entries accompany each topic as well helping students to better understand each issue As the world hurtles into the 21st century these natural resource issues are becoming increasingly important with all global citizens having a significant stake in how these conflicts arise and play out

The Difference that Gender Makes to International Peace and Security Sara Davies, Nicole George, Jacqui True, 2018-10-29 Fifteen years after the adoption of UN Security Council Resolution 1325 which establishes the Women Peace and Security agenda there is now a need to assess the impacts of gender equality efforts and to understand why and how gender equality reforms have advanced to the extent that they have This book examines how international peace and security is re envisioned from a gender perspective by mostly focusing on the nuances presented by the Asia Pacific region It argues that despite the diversity of political socio cultural and economic systems in the Asia Pacific women and girls in the region continue to experience similar forms of insecurities Several countries in the Asia Pacific have demonstrated relative peace and stability In addition women s leadership and participation in peacebuilding are and continue to be increasingly recognized in the region too However as the chapters in this book demonstrate applying a critical gender analysis allows for the interrogation of veneers of political order which can then mask or normalise everyday gendered insecurities The analysis of country cases such as Myanmar Cambodia and Fiji underscores a rethinking of the political order in the Asia Pacific which leaves existing gender inequalities intact The chapters in this book were originally published in a special issue in the International Feminist Journal of Politics

The Politics of Immigration Tom K. Wong, 2017 Immigration has been deeply woven into the fabric of American nation building since the founding of the Republic Indeed immigrants have played an integral role in American history but they are also intricately tied to America s present and will feature prominently in America s future Immigration can shape a nation Consequently immigration policy can maintain replenish and even reshape it Immigration policy debates are thus seldom just about who to let in and how many as a nation s immigration policies can define its identity This is what helps breathe fire into the politics of immigration Against this backdrop political parties promote their own narratives about what the immigration policies of a nation of immigrants should be while undermining the contrasting narratives of political opponents Racial and ethnic groups mobilize for political inclusion as immigration increases their numbers but are often confronted by the counteractive mobilization of nativist groups Legislators calibrate their positions on immigration by weighing traditional electoral concerns against a new demographic normal that is reshaping the American electorate At stake are not just what our immigration policies will be but also what America can become What are the determinants of immigration policymaking

in the United States The Politics of Immigration focuses the analytical lens on the electoral incentives that legislators in Congress have to support or oppose immigration policy reforms at the federal level In contrast to previous arguments Tom K Wong argues that contemporary immigration politics in the United States can be characterized by three underlying features the entrenchment of partisan divides among legislators on the issue of immigration the political implications of the demographic changes that are reshaping the American electorate and how these changes are creating new opportunities to define what it means to be an American in a period of unprecedented national origins racial and ethnic and cultural diversity
