Smallman-Raynor, Andrew D. Cliff, J. Keith Ord, Peter Haggett, 2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are

replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases

International Strategy of Emerging

Market Firms Andrei Panibratov, 2017-03-16 Emerging economies are expected to be in the driver's seat of the global economy in the medium and long term. Large multinational corporations will account for much of this activity. In this textbook, Andrei Panibratov explains how emerging market firms accumulate and exploit market knowledge to develop competitive advantages whilst operating globally. Chapters dedicated to the key emerging economies Brazil, Russia, India, and China (BRIC) are enhanced by detailed case studies of large firms' activities. The book is divided into four parts focusing on the following: An outline of the relevant terminology and the context of the international strategy of emerging market firms providing an introductory foundation for the whole book. A guide to the evolution of perspectives regarding international strategy designed to illustrate the changes and trends in the recent academic research on internationalization. A country-by-country illustration of the internationalization of BRIC economies and firms providing an overall picture of each country's global integration. Outward investments and strategies. The concepts and practices behind the strategies employed by different firms. Written by an established international business scholar, this book is essential reading for students of international strategy who wish to understand the importance of the emerging economies.

The Palgrave Handbook of Race and Ethnic Inequalities in Education Peter A.J. Stevens, A. Gary Dworkin, 2019-07-05 This authoritative state-of-the-art reference work builds on its first edition to provide a cutting-edge systematic review of the relationship between race, ethnicity, and educational inequality. Studying 25 different national contexts drawn from every inhabited continent on earth and building upon material from the earlier edition, the work analyses educational policies, practices, and research on minority students, immigrants, and refugees. The editors and contributors explore principal research traditions from countries as diverse as Argentina, China, Norway, and South Africa, examining the factors promoting social cohesion as well as considerations regarding the use of international test score data. Seamlessly integrating findings of national reviews, the editors and contributors analyse how national contexts of race and ethnic relations shape the character and content of educational inequalities and deftly map out new directions for future research in the area. Global in its perspective and definitive in content, this one-stop volume will be an indispensable reference resource for a wide range of academics, students, and researchers in the fields of education, sociology, race, and ethnicity studies, and social policy.

Mining in Latin America Kalowatie Deonandan, Michael L. Dougherty, 2016-07-15 The last two decades have witnessed a dramatic expansion and intensification of mineral resource exploitation and development across the global south, especially in Latin America. This shift has brought mining more visibly into global public debates and spurred a great deal of controversy and conflict. This volume assembles new scholarship that provides critical perspectives on these issues. The book marshals original empirical work from leading social scientists in a variety of disciplines to address a range of questions about the practices of mining companies on the ground, the impacts of

mining on host communities and the responses to mining from communities civil society and states The book further explores the global and international causes consequences and innovations of this new era of mining activity in Latin America Key issues include the role of Canadian mining companies and their investment in the region and to a lesser extent the role of Chinese mining capital Several chapters take a regional perspective while others are based on empirical data from specific countries including Bolivia Brazil El Salvador Guatemala and Peru Comprehensive Geographic Information Systems, 2017-07-21 Geographical Information Systems Three Volume Set is a computer system used to capture store analyze and display information related to positions on the Earth s surface It has the ability to show multiple types of information on multiple geographical locations in a single map enabling users to assess patterns and relationships between different information points a crucial component for multiple aspects of modern life and industry This 3 volumes reference provides an up to date account of this growing discipline through in depth reviews authored by leading experts in the field VOLUME EDITORSThomas J CovaThe University of Utah Salt Lake City UT United StatesMing Hsiang TsouSan Diego State University San Diego CA United StatesGeorg BarethUniversity of Cologne Cologne GermanyChunqiao SongUniversity of California Los Angeles CA United StatesYan SongUniversity of North Carolina at Chapel Hill Chapel Hill NC United StatesKai CaoNational University of Singapore SingaporeElisabete A SilvaUniversity of Cambridge Cambridge United Kingdom Covers a rapidly expanding discipline providing readers with a detailed overview of all aspects of geographic information systems principles and applications Emphasizes the practical socioeconomic applications of GIS Provides readers with a reliable one stop comprehensive guide saving them time in searching for the information they need from different sources **The Transition of Religion to Culture in Law and Public Discourse** Lori Beaman, 2020-03-27 This book explores the recent trend toward the transformation of religious symbols and practices into culture in Western democracies Analyses of three legal cases involving religion in the public sphere are used to illuminate this trend a municipal council chamber a town hall and town board meetings Each case involves a different national context Canada France and the United States and each illustrates something interesting about the shape shifting nature of religion specifically its flexibility and dexterity in the face of the secular the religious and the plural Despite the differences in national contexts in each instance religion is transformed into culture or heritage by the courts to justify or excuse its presence and to distance the state from the possibility that it is violating legal norms of distance from religion The cultural practice or symbol is represented as a shared national value or activity Transforming the Other into Us through reconstitution is also possible Finally anxiety about the Other becomes part of the story of rendering religion as culture resulting in the impugning of anyone who dares to question the putative shared culture The book will be essential reading for students academics and policy makers working in the areas of sociology of religion religious studies socio legal studies law and public policy constitutional law religion and politics and cultural studies

Susceptibility Application A.C. Da Silva,M.T. Whalen,J. Hladil,L. Chadimova,D. Chen,S. Spassov,F. Boulvain,X.

Devleeschouwer ,2015-10-14 Magnetic susceptibility MS is a tool frequently used by geologists on sediments or rocks to perform correlations and sea level or climatic reconstructions Applied measurements are made on unoriented bulk samples and bulk MS is mostly influenced by the magnetic mineral content of the rock and often interpreted as influenced by detrital inputs Magnetic data acquisition is fast and straightforward and this allows the high resolution sampling needed for palaeoclimatic research e g spectral analysis However the link with detrital inputs is not always preserved and the impact of diagenesis on the final MS signal can blur primary information This volume includes contributions dealing with the origin of the magnetic minerals and the application of MS as a palaeoenvironmental or palaeoclimatic proxy and also as a tool to provide astronomical calibration in order to improve the chronology of selected time intervals **Microcredit and**

Women's Empowerment Aminul Faraizi,Taskinur Rahman,Jim McAllister,2014-04-04 Using a case study of Bangladesh and based on a long term participatory observation method this book investigates claims of the success of microcredit as well as the critiques of it in the context of women s empowerment It confronts the distinction between women s increasing wealth as a consequence of the success of microcredit programmes and their apparent non commensurate empowerment looking at two organisations the Grameen Bank and the Bangladesh Rural Advancement Committee as they operate in two localities in rural Bangladesh in order to discover how enrichment and empowerment are often confused The book goes on to establish that the well publicised success stories of the microcredit programme are blown out of proportion and that the dynamics of collective responsibility for repayment of loans by a group of women borrowers usually seen to be a tool for the success of microcredit is in fact no less repressive than traditional debt collectors This book makes a contribution to development debates challenging adherents to more closely specify those conditions under which microcredit does indeed have validity as well as providing insights relevant to South Asian Studies and Development Studies *Trade Shows in the Globalizing*

Knowledge Economy Harald Bathelt,Francesca Golfetto,Diego Rinallo,2014 This book presents a radically innovative view on trade shows as knowledge rich places where firms learn through observation and interaction with other economic actors and as enablers rather than mere consequences of globalization Traditionally seen as marketing tools trade shows are conceptualised as temporary clusters that facilitate the creation and diffusion of knowledge across geographical distances even in the age of social media The book is organized in four parts Part I lays out the conceptual foundations of the knowledge based perspective from the early development of trade fairs to modern day events Part II analyses specific global developments focussing on the trade show ecologies of Europe North America and the Asia Pacific region Part III investigates differences in the nature of knowledge generation practices across international hub shows exports shows and import shows in different industries and investigates competition between such events Part IV discusses the implications of a knowledge based conceptualisation of trade shows The book will be of interest to scholars and students in economic

geography management marketing organization studies political science and sociology It also has practical implications for trade show organisers on how to make their events more competitive through knowledge based strategies for industry associations and cities on how to use these events for collective place marketing purposes and for policy makers on how to use trade shows for export promotion and innovation policies

Knowledge Marian Adolf, Nico Stehr, 2016-09-22 As we move through our modern world the phenomenon we call knowledge is always involved Whether we talk of know how technology innovation politics or education it is the concept of knowledge that ties them all together But despite its ubiquity as a modern trope we seldom encounter knowledge in itself How is it produced where does it reside and who owns it Is knowledge always beneficial will we know all there is to know at some point in the future and does knowledge really equal power This book pursues an original approach to this concept that seems to define so many aspects of modern societies It explores the topic from a distinctly sociological perspective and traces the many ways that knowledge is woven into the very fabric of modern society
