The Millennial City Markus Moos, Deirdre Pfeiffer, Tara Vinodrai, 2017-08-04 Millennials have captured our imaginaries in recent years The conventional wisdom is that this generation of young adults lives in downtown neighbourhoods near cafes public transit and other amenities Yet this depiction is rarely unpacked nor problematized Despite some commonalities the Millennial generation is highly diverse and many face housing affordability and labour market constraints Regardless as the largest generation following the post World War II baby boom Millennials will surely leave their mark on cities This book assesses the impact of Millennials on cities It asks how the Millennial generation differs from previous generations in terms of their labour market experiences housing outcomes transportation decisions the opportunities available to them and the constraints they face It also explores the urban planning and public policy implications that arise from these generational shifts This book offers a generational lens that faculty students and other

Geographies of Migration Richard Wright,2018-02-02 Migration is an enormously broad topic of academic enquiry engaging researchers from many different social science disciplines A wide variety of contributors from across the globe capture some of the methodological and conceptual range of migration research in the discipline of Geography today This volume covers a large area geographically and in the expanse of subject areas involved eighteen chapters investigate migration from to or within at least fifteen countries with several sections spanning multiple places and scales Many chapters are deeply concerned with vulnerable populations which is not only a characteristic of much immigration scholarship but also one that connects with other areas of geography The study of geographical assertions of sovereign power via the discourses of disorder chaos and crisis shows that in these transnational times national power is being violently reasserted on within and beyond international borders Other important topics covered include migration and climate change illegality security government policy labor family and sexual orientation This book was previously published as a special issue of Annals of the Association of American Geographers **Cash Not Care** Mo Stewart,2016-09-14 Mo Stewart is a former healthcare professional a disabled female veteran and an independent researcher This book is the culmination of six years of self funded research and the evidence exposes the influence of corporate America since 1992 with the future welfare reforms of the UK

The impact of the enforced austerity measures of the UK government is identified as they negatively affect the welfare and the survival of the chronically sick and disabled population in receipt of welfare benefits when unfit to work The research has informed welfare reform debates in the House of Lords and the House of Commons since 2011 and contributed to the evidence used by the United Nations to investigate the UK government for breaches of the Human Rights of sick and disabled people Endorsed by the disabled community and by academics the research has identified the adoption of lethal social policies copied from American social security policies and linked to the death of thousands of the most vulnerable of all as the UK welfare state is systematically demolished as all planned over thirty years ago by a previous Conservative government

To Rule the Waves Bruce Jones, 2022-11-22 From a brilliant Brookings Institution expert an important The Wall Street Journal and penetrating historical and political study Nature of the critical role that oceans play in the daily struggle for global power in the bestselling tradition of Robert Kaplan's *The Revenge of Geography* For centuries oceans were the chessboard on which empires battled for supremacy But in the nuclear age air power and missile systems dominated our worries about security and for the United States the economy was largely driven by domestic production with trucking and railways that crisscrossed the continent serving as the primary modes of commercial transit All that has changed as nine tenths of global commerce and the bulk of energy trade is today linked to sea based flows A brightly painted forty foot steel shipping container loaded in Asia with twenty tons of goods may arrive literally anywhere else in the world how that really happens and who actually profits from it show that the struggle for power on the seas is a critical issue today Now in vivid closely observed prose Bruce D Jones conducts us on a fascinating voyage through the great modern ports and naval bases from the vast container ports of Hong Kong and Shanghai to the vital naval base of the American Seventh Fleet in Hawaii to the sophisticated security arrangements in the Port of New York Along the way the book illustrates how global commerce works that we are amidst a global naval arms race and why the oceans are so crucial to America's standing going forward As Jones reveals the three great geopolitical struggles of our time for military power for economic dominance and over our changing climate are playing out atop within and below the world's oceans The essential question he shows is this who will rule the waves and set the terms of the world to come

Urban Geopolitics Jonathan Rokem, Camillo Boano, 2017-08-21 In the last decade a new wave of urban research has emerged putting comparative perspectives back on the urban studies agenda However this research is frequently based on similar case studies on a few selected cities in America and Europe and all too often focus on the abstract city level with marginal attention given to particular local contexts Moving away from loosely defined urban theories and contexts this book argues it is time to start learning from and compare across different contested cities It questions the long standing Euro centric academic knowledge production that is prevalent in urban studies and planning research This book brings together a diverse range of international case studies from Latin America South and South East Asia Eastern Europe Africa and the Middle East to offer an in depth understanding

of the worldwide contested nature of cities in a wide range of local contexts It suggests an urban ontology that moves beyond the urban West and North as well as adding a comparative relational understanding of the contested nature that Southern cities are developing This timely contribution is essential reading for those working in the fields of human geography urban studies planning politics area studies and sociology
