**Climate Change from the Streets** Michael Méndez, 2020-01-07 An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy Although the science of climate change is clear policy decisions about how to respond to its effects remain contentious Even when such decisions claim to be guided by objective knowledge they are made and

implemented through political institutions and relationships and all the competing interests and power struggles that this implies Michael Mendez tells a timely story of people place and power in the context of climate change and inequality He explores the perspectives and influence low income people of color bring to their advocacy work on climate change In California activist groups have galvanized behind issues such as air pollution poverty alleviation and green jobs to advance equitable climate solutions at the local state and global levels Arguing that environmental protection and improving public health are inextricably linked Mendez contends that we must incorporate local knowledge culture and history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities

Driven by Fear Guenter B Risse, 2015-12-30 From the late nineteenth century until the 1920s authorities required San Francisco's Pesthouse to segregate the diseased from the rest of the city Although the Pesthouse stood out of sight and largely out of mind it existed at a vital nexus of civic life where issues of medicine race class environment morality and citizenship entwined and played out Guenter B Risse places this forgotten institution within an emotional climate dominated by widespread public dread and disgust In Driven by Fear he analyzes the unique form of stigma generated by San Franciscans Emotional states like xenophobia and racism played a part Yet the phenomenon also included competing medical paradigms and unique economic needs that encouraged authorities to protect the city's reputation as a haven of health restoration As Risse argues public health history requires an understanding of irrational as well as rational motives To that end he delves into the spectrum of emotions that drove extreme measures like segregation and isolation and fed psychological ideological and pragmatic urges to scapegoat and stereotype victims particularly Chinese victims of smallpox leprosy plague and syphilis Filling a significant gap in contemporary scholarship Driven by Fear looks at the past to offer critical lessons for our age of bioterror threats and emerging infectious diseases

Farrell, Niamh Hardiman, 2021-09-01 Ireland has enjoyed continuous democratic government for almost a century an unusual experience among countries that gained their independence in the 20th century But the way this works in practice has changed dramatically over time Ireland's colonial past had an enduring influence over political life for much of the time since independence enabling stable institutions of democratic accountability while also shaping a dismal record of economic under development and persistent emigration More recently membership of the EU has brought about far reaching transformation across almost all aspects of Irish life But if anything the paradoxes have only intensified Now one of the most open economies in the world Ireland has experienced both rapid growth and one of the most severe crashes in the wake of the Great Recession On some measures Ireland is among the most affluent countries in the world yet this is not the lived experience for many of its citizens Ireland is an unequivocally modern state yet public life continues to be marked by formative ideas and values in which tradition and modernity are held in often uneasy embrace It is a small state that has ambitions to leverage its distinctive place in the Atlantic and European worlds to carry more weight on the world stage Ireland continues to be deeply connected to Britain through ties of culture and trade now matters of deep concern in the context of Brexit And the old fault lines between North and South between Ireland and Britain which had been at the core of one of Europe's longest and bloodiest civil conflicts risk being reopened by Britain's new hard edged approach to national and European identities These key issues are teased out in the 41 chapters of this book making this the most comprehensive volume on Irish politics to date *The Post-Earthquake City* Paul Cloke, David Conradson, Eric Pawson, Harvey C. Perkins, 2023-02-15 This book critically assesses Christchurch New Zealand as an evolving post earthquake city It examines the impact of the 2010-13 Canterbury earthquake sequence employing a chronological structure to consider damage and displacement recovery and renewal and the city in transition It offers a framework for understanding the multiple experiences and realities of post earthquake recovery It details how the rebuilding of the city has occurred and examines what has arisen in the context of an unprecedented opportunity to refashion land uses and social experience from the ground up A recurring tension is observed between the desire and tendency of some to reproduce previous urban orthodoxies and the experimental efforts of others to fashion new cultures of progressive place making and attention to the more than human city The book offers several lessons for understanding disaster recovery in cities It illuminates the opportunities disasters create for both the reassertion of the familiar and the emergence of the new highlights the

divergence of lived experience during recovery and considers the extent to which a post disaster city is prepared for likely climate futures The book will be valuable reading for critical disaster researchers as well as geographers sociologists urban planners and policy makers interested in disaster recovery
