**Law and Regulation of Mobile Payment Systems** Joy Malala, 2017-11-28 Over the last ten years, mobile payment systems have revolutionized banking in some countries in Africa. In Kenya, the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market, it has attracted over 18 million subscribers, which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements, and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

**The Drone Memos** Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists, including US citizens. Publishers Weekly starred review. In the long response to 9/11, the US government initiated a deeply controversial policy of targeted killing, the extrajudicial execution of suspected terrorists and militants typically via drones. A remarkable effort was made to legitimize this practice, one that most human rights experts agree is illegal and that the United States has historically condemned. In *The Drone Memos*, civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action. In a lucid and provocative introduction, Jaffer—who led the ACLU legal team that secured the release of many of the documents—evaluates the drone memos in light of domestic and international law. He connects the documents' legal abstractions to the real-world violence they allow and makes the case that we are trading core principles of democracy

and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

organizations and NGOs concerned with wealth and income distributions      *Modern Sufis and the State* Katherine Pratt Ewing, Rosemary R. Corbett, 2020-08-25 Sufism is typically thought of as the mystical side of Islam. In recent years it has been held up as a supposedly peaceful alternative to the spread of forms of Islam associated with violence, an embodiment of democratic ideals of tolerance and pluralism. Are Sufis in fact as otherworldly and apolitical as this stereotype suggests? *Modern Sufis and the State* brings together a range of scholars including anthropologists, historians, and religious studies specialists to challenge common assumptions that are made about Sufism today. Focusing on India and Pakistan within a broader global context, this book provides locally grounded accounts of how Sufis in South Asia have engaged in politics from the colonial period to the present. Contributors foreground the effects and unintended consequences of efforts to link Sufism with the spread of democracy and consider what roles scholars and governments have played in the making of twenty-first century Sufism. They critique the belief that Salafism and Sufism are antithetical, offering nuanced analyses of the diversity, multivalence, and local embeddedness of Sufi political engagements and self-representations in Pakistan and India. Essays question the portrayal of Sufi shrines as sites of toleration, peace, and harmony, exploring cases of tension and conflict. A wide-ranging interdisciplinary collection, *Modern Sufis and the State* is a timely call to think critically about the role of public discourse in shaping perceptions of Sufism.

Globalization is a phenomenon which has attracted much attention in the past, but there are still many questions that remain

unanswered This book categorizes globalization into three types Financial Globalization the collapse of the Cold War order and the ensuing convergence toward the capitalistic system and the rise of the emerging nations The globalization of capitalism has two implications One is trust in the market economy system and support for a minimal state while another is an aspect of the Casino Capitalism as typically seen by the rampant emergence of hedge funds This book explores both the light and shadows cast by globalization endeavoring to identify both positive and problematic effects of the globalization process on the world economy For this purpose we would first examine the nature and the feature of the world capitalism in relation to globalization Then we would discuss and investigate the path along which important nations first the developed nations the USA EU and Japan followed by the emerging nations BRICs have proceeded under the influence of globalization Focusing on this phenomenon from diverse points of view which is to be taken by the first rank contributors in their fields will be extraordinarily fruitful for understanding not only the world capitalism This collection from a selection of leading international contributors will not only shed light on world capitalism as it is now but will also offer pointers as to its future directions

The Difference that Gender Makes to International Peace and Security Sara E. Davies, Nicole George, Jacqui True, 2018-10-29 Fifteen years after the adoption of UN Security Council Resolution 1325 which establishes the Women Peace and Security agenda there is now a need to assess the impacts of gender equality efforts and to understand why and how gender equality reforms have advanced to the extent that they have This book examines how international peace and security is re envisioned from a gender perspective by mostly focusing on the nuances presented by the Asia Pacific region It argues that despite the diversity of political socio cultural and economic systems in the Asia Pacific women and girls in the region continue to experience similar forms of insecurities Several countries in the Asia Pacific have demonstrated relative peace and stability In addition women s leadership and participation in peacebuilding are and continue to be increasingly recognized in the region too However as the chapters in this book demonstrate applying a critical gender analysis allows for the interrogation of veneers of political order which can then mask or normalise everyday gendered insecurities The analysis of country cases such as Myanmar Cambodia and Fiji underscores a rethinking of the political order in the Asia Pacific which leaves existing gender inequalities intact The chapters in this book were originally published in a special issue in the International Feminist Journal of Politics

The Empirical and Institutional Dimensions of Smart Specialisation Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region s economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region s linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature The Empirical and Institutional Dimensions of Smart Specialisation draws together some

of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels

The Tyranny of the Straight Line Min-Kyung Lee, 2024-04-02 A revolutionary study of nineteenth century Parisian cartography and its role in shaping a modern conception of space Maps are rarely given the same attention as other print media or art forms in urban history Author Min Kyung Lee shows their rich potential in this lavishly illustrated study which brings together maps and other archival materials along with drawings and paintings She works across disciplines to examine mapping practices in the development of nineteenth century Paris and the transformative role that urban mapping had on the city's modernization Lee investigates Paris's formation as a modern city

ultimately framing the practice of cartography as a catalyst for the emergence of new spatial and compositional theories Beginning with an examination of the emblematic urban plan that Napoléon III gave to the prefect of the Seine Georges Eugène Haussmann in 1853 Lee explores the significance of the map itself the means of its production through surveying the methods of its use and reception by architects engineers and administrators and its place in the visual culture of Paris's modernization At the heart of this exploration is a focus on orthography in architecture and the new quality of exactitude in modern mapping practices The precise grid structure of orthographic maps and plans evinced a sense of objectivity yet it was not without political context and social consequences as Lee demonstrates throughout *FCC Record* United States.
