it under challenging material conditions One chapter considers how international support for learner centered pedagogy has influenced national policies Subsequent chapters utilize qualitative data from classroom observations interviews and focus group discussions across six Tanzanian secondary schools to examine how such policies shape local practices of professional development inclusion gender and classroom discourse In addition the volume presents an analysis of the benefits and challenges of international research between Tanzanian and U S scholars illuminating the complexity of collaboration as it simultaneously presents the outcome of joint research on teachers beliefs and practices The chapters conclude with questions for discussion that can be used in courses on international development social policy and teacher education This volume written by a multi national team of scholar practitioners makes an important contribution to our understanding of learner centered teaching and collaborative educational research Based on an intensive investigation in Tanzania of a professional development program and teachers efforts to conceptualize and implement a globally promoted pedagogical approach the authors illustrate and critically analyze how these practices are enabled and constrained by cultural lenses power relations and material conditions Importantly they also examine reflexively how cultural power and resource issues shaped their struggle to engage in a collective praxis of qualitative inquiry The tensions referenced in the title sparked valuable insights which will be useful to educators researchers and policy makers Mark Ginsburg FHI 360 and Teachers College Columbia University

Global Gold Production Touching Ground Boris Verbrugge, Sara Geenen, 2020-05-04

In recent decades gold mining has moved into increasingly remote corners of the globe. Aside from the expansion of industrial gold mining, many countries have simultaneously witnessed an expansion of labor intensive and predominantly informal artisanal and small scale gold mining. Both trends are usually studied in isolation which contributes to a dominant image of a dual gold mining economy. Counteracting this dominant view, this volume adopts a global perspective and demonstrates that both industrial gold mining and artisanal and small scale gold mining are functionally integrated into a global gold production system. It couples an analysis of structural trends in global gold production expansion, informalization and technological innovation to twelve country case studies that detail how global gold production becomes embedded in institutional and ecological structures.
