Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem With over a billion monthly active users Facebook as a nation is overtaking China as the largest country in the world President Barack Obama in his 2011 State of the Union Address called America the nation of Edison and the Wright brothers and of Google and Facebook U S Chief Information Officer Steven VanRoekel opines that America has become a Facebook nation that demands increased transparency and interactivity from the federal government Ubiquitous social networks such as Facebook Google Twitter and YouTube are creating the technologies infrastructures and big data necessary for Total Information Awareness a controversial surveillance program proposed by DARPA after the 9 11 attacks NSA's secret PRISM program has

reinvigorated WikiLeaks founder Julian Assange's accusation that Facebook is the most appalling spying machine that has ever been invented. Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Technocreep Thomas P. Keenan, 2014-09-13 Technology is rapidly moving into our bodies, writes cyber expert Keenan, and this book gives a chilling look ahead into where that road may lead us on a one-way trip to the total surrender of privacy and the commoditization of intimacy. Here is the definitive dissection of privacy eroding and life-invading technologies coming at you from governments, corporations, and the person next door. Take, for example, Girls Around Me, a Russian-made iPhone App that allowed anyone to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles. It combined this information in a way never intended by the original poster: Going to a Disney theme park? Your creepy new MagicBand will alert Minnie Mouse that you're on the way, and she'll know your kid's name when you approach her. Thinking about sending your DNA off to Ancestry.com for some genetic genealogy? Perhaps you should think again: your genetic information could be used against you. With security scares like the Heartbleed bug, which compromised even supposedly safe internet behemoths like Google and Yahoo, becoming more commonplace, this book is a must-read for anybody who values their privacy in a wired world.
