Breslaw,2008-01-01 In this sweeping biography Elaine G Breslaw examines the life of Dr Alexander Hamilton 1712 1756 a highly educated Scottish physician who immigrated to Maryland in 1738 From an elite European family Hamilton was immediately confronted with the relatively primitive social milieu of the New World He faced unfamiliar and challenging social institutions the labor system that relied on black slaves extraordinarily fluid social statuses distasteful business methods unpleasant conversational quirks as well as variant habits of dress food and drink that required accommodation and when possible acceptance Paradoxically the more acclimated he became to Maryland ways the greater

his impulse to change that society and make it more satisfying for himself both emotionally and intellectually Breslaw perceptively describes the ways in which Hamilton tried to transform the society around him attempting to re create the world he had left behind and thereby justify his continued residence in such an unsophisticated place Hamilton best known as the author of the Itinerarium a shrewd and insightful account of his journey through the colonies in 1744 also founded the Tuesday Club of Annapolis promoted a local musical culture and in his letters and essays provided witty commentary on the American social experience In addition to practicing medicine Hamilton participated in local affairs transporting to Maryland some of the rationalist ideas about politics religion and learning that were germinating in Scotland s early Enlightenment As Breslaw explains Hamilton s writings tell us that those adopted ideas were given substance and vitality in the New World long before the revolutionary crises Throughout her narrative Breslaw usefully sets Hamilton s life in both Scotland and America against the background of the major political military religious social and economic events of his time The largely forgotten story of a fascinating cosmopolitan and complex Scotsman Dr Alexander Hamilton and Provincial America illuminates our understanding of elites as they navigated their eighteenth century world **TID. ,1972** **ERDA Energy Research Abstracts ,1983** **Heat Transfer** Vyacheslav Vikhrenko,2011-12-22 Heat transfer is involved in numerous industrial technologies This interdisciplinary book comprises 16 chapters dealing with combined action of heat transfer and concomitant processes Five chapters of its first section discuss heat effects due to laser ion and plasma solid interaction In eight chapters of the second section engineering applications of heat conduction equations to the curing reaction kinetics in manufacturing process their combination with mass transport or ohmic and dielectric losses heat conduction in metallic porous media and power cables are considered Analysis of the safety of mine hoist under influence of heat produced by mechanical friction heat transfer in boilers and internal combustion engine chambers management for ultrahigh strength steel manufacturing are described in this section as well Three chapters of the last third section are devoted to air cooling of electronic devices ERDA Energy Research Abstracts United States.
