Michelin Fleet Solutions As Case Study:

Strategy Implementation Kurt Verweire, 2014-04-24 Strategy implementation or strategy execution is a hot topic today. Managers spend significant resources on consulting and training in the hope of creating brilliant strategies but all too often brilliant strategies do not translate into brilliant performance. This book presents new conceptual models and tools that can be used to implement different strategies. The author analyses how market leaders have benefitted from successful strategy implementation and provides the reader with a comprehensive and systematic framework to tackle strategy implementation challenges. Have clear strategic choices been made? Are actions aligned with the strategy? What is the organizational context for the strategy? In answering these simple questions, the book provides students of strategic management along with managers involved in designing and implementing strategies with a valuable resource.

XaaS: Everything-as-a-service - The Lean And Agile Approach To Business Growth Shantanu Bhattacharya, Lipika Bhattacharya, 2021-10-13 XaaS Everything as a Service. The Lean and Agile Approach to Business Growth takes the reader into the bold new world of pay per use for a product or service. From the perspective of the customer, the servitization model yields multiple benefits: the consumer can try out the product/service at a relatively low cost; the risk is mitigated; capital expenses can be converted into operating expenses; it is not needed to forecast how often the product/service is used; and only parts of the product/service needed can be used. Similarly, a provider can benefit by having a larger market coverage, steadier stream of revenues, upgrades as and when needed, sharing of fixed assets across consumers, practicing of value-based pricing, and unbundling or bundling utility for consumers using appropriate pricing techniques. However, this nanoization of products/services is tricky and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset; dividing the product/service forces the provider to take a value-driven approach to his product/service and consequently eliminate all non-value-added activities. The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider and as a guide to understanding the customer's needs. The book also covers data acquisition, data analysis and synthesis, and data application needs of the XaaS model with simple examples and case studies from the business world of firms that achieve these objectives successfully.

The Case Study Companion Scott Andrews, 2021-05-25 The Case Study method of teaching and learning adopted by business schools and management centres globally provides an important function in management education but employing it effectively can often be a challenge. This book provides practical insights, tools, and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment.

supporting students own development of cases to showcase good practice in organisations The final section of this book showcases some of the resources available providing links and reviews of additional material that can support future case teaching and writing practice including publication The Case Study Companion is designed for lecturers using cases within their teaching across all management disciplines as well as those training for Professional Development and Management Education qualifications It will also be useful for postgraduate MBA and Executive Education students wanting to make the most of case studies in their learning and assessments
