*Ranking of low-moisture foods in support of microbiological risk management* World Health Organization,Food and Agriculture Organization of the United Nations,2021-02-28 **Ranking of low-moisture foods in support of microbiological risk management: Meeting report and systematic review** Food and Agriculture Organization of the United Nations,World Health Organization,2022-07-22 Low moisture foods LMF are foods that are naturally low in moisture or are produced from higher moisture foods through drying or dehydration processes These foods typically have a long shelf life and have been perceived for many years to not represent microbiological food safety risk hazards However in recent years a number of outbreaks of foodborne illnesses linked to LMF has illustrated that despite the fact that microorganisms cannot grow in these products bacteria do have the possibility to persist for long periods of time in these matrices Responding to a request from the Codex Committee on Food Hygiene CCFH the Food and Agriculture Organization of the United Nations FAO and the World Health Organization WHO implemented a series of activities aimed at collating and analysing the available information on microbiological hazards related to LMF and ranking the foods of greatest concern from a microbiological food safety perspective Seven categories of LMF which were ultimately included in the ranking process and the output of the risk ranking in descending order was as follows cereals and grains dried protein products spices and dried herbs nuts and nut products confections and snacks dried fruits and vegetables and seeds for consumption

Author's Handbook of Styles for Life Science Journals Michel Atlas,1995-11-08 Let the Author s Handbook of Styles for Life Science Journals save you time and trouble by providing a one stop resource for all your manuscript writing requirements No more plowing through your journal collection or wandering the library stacks to get those elusive journal pages containing instructions to authors This unique book contains all the information you need to know whether the journal will consider your manuscript the journal s submission address how to construct the abstract illustrations tables and references and specific information on copyright multiple authorship statistical analyses and page charges The Author s Handbook of Styles for Life Science Journals gives all this information for 440 of the most important English language life science journals Titles were selected from the Journal Rankings by Times Cited list in the Science Citation Index Journal Citation Report Because this report is heavily weighted toward the medical sciences other life science journals are incorporated into the book based on general level of prestige and reputation In addition some new titles that promise to be important to their fields like Nature Medicine and Emerging Infectious Diseases are also included Organized by journal title the handbook s entries are uniformly arranged to allow direct comparison between journals Information is presented in an

easy to use easy to read format with clear and explicitly stated instructions The Author s Handbook of Styles for Life Science Journals gives authors in the life sciences all the information necessary for the correct and complete compilation of a manuscript for submission to their journal of choice

**Trends in the Systematics of Bacteria and Fungi** Paul Bridge,David Smith,Erko Stackebrandt,2020-12-09 Methods in microbial systematics have developed and changed significantly in the last 40 years This has resulted in considerable change in both the defining microbial species and the methods required to make reliable identifications Developments in information technology have enabled ready access to vast amounts of new and historic data online Establishing both the relevance and the most appropriate use of this data is now a major consideration when undertaking identifications and systematic research This book provides some insights into how current methods and resources are being used in microbial systematics together with some thoughts and suggestions as to how both methodologies and concepts may develop in the future

[Database Directory and Master Indices](#) Edwin J. Atencio,Howard S. Bilofsky,June Bossinger,2014-05-10 Nucleotide Sequences 1986 1987 Volume VIII

Database Directory and Master Indices presents data that reflect the information found in GenBank Release 44.0 of August 1986. This book provides information pertinent to the unique international collaboration between two leading nucleotide sequence data libraries, one based in Europe and one in the United States. Organized into 13 sections, this volume begins with an overview of the sequences, some basic identifying information, and some of the biological annotations. This text then discusses the EMBL Nucleotide Sequence Data Library, an international center of fundamental research with its main emphasis in the fields of cell biology, molecular structures, instrumentation, and differentiation. This book discusses as well the GenBank database established in 1982 by the National Institute of General Medical Sciences (NIGMS) of the U.S. National Institutes of Health (NIH). This book is a valuable resource for molecular biologists and other investigators collecting the large number of reported DNA and RNA sequences and making them available in computer-readable form.

**Union List of Selected Serials in the University of Michigan Library**, 1985. Mycotechnology Mahendra Rai, 2013-12-30. Mycotechnology has a crucial role to play in the 21st century. Fungi are bioprotectors, bioremediators, biofertilizers, drug producers, and involved in everyday life. Mycotechnology: Present Status and Future Prospects includes current and rare topics on mycotechnology such as molecular techniques for analysis of soil fungi, diagnosis of ochratoxin A-producing fungi, identification of ectomycorrhizal fungi, SPPADBASE, bioactive sesquiterpenes, mycological applications of Raman spectroscopy, etc. Key Features: Discusses latest developments in mycotechnology. Addresses molecular diagnosis of mycotoxins, soil microbes, and ectomycorrhizal fungi. Includes role of type culture collection in mycological research and applications, e.g., drug discovery from fungi. Deals with the role of fungal chitinase. Focuses on strategic role of AMF in agroecosystem and disease control. Contains database of PCR primers for phytopathogenic fungi. This book is essential reading for mycologists, biotechnologists, microbiologists, botanists, agronomists, physicists, biochemists.

Applications and Systematics of Bacillus and Relatives Roger Berkeley, Marc Heyndrickx, Niall Logan, Paul De Vos, 2008-04-30. Inspired by the pace of change in the taxonomy of the aerobic endospore-forming bacteria, the Bacillus 2000 symposium, on which this book is based, was held in Bruges, Belgium, in August 2000 and was supported by the Federation of European Microbiological Societies, the Belgian Society for Microbiology, and several commercial sponsors. Bringing taxonomists interested in Bacillus and its relatives together with people who work with these organisms in medicine, agriculture, and industry allowed those attending to appreciate the overlaps and interactions of their areas of expertise in the absence of any comprehensive treatment of the current systematics of the group. The meeting was a great success and has resulted in the production of these proceedings, *Applications and Systematics of Bacillus and Relatives*, providing an up-to-date and comprehensive treatise on the classification, identification, and applications of the aerobic endospore-forming bacteria. It is an essential reference for

all microbiologists interested in these organisms Valuable reference work for all those interested in the systematics of Bacillus and its relatives Produced in response to the successful Bacillus 2000 meeting in Bruges and was supported by the Federation of European Microbiological Societies the Belgian Society for Microbiology and several commercial sponsors Of use to those working in fields as diverse as medicine agriculture food and industry Comprehensive and up to date analysis of the systematics of these organisms Includes the application of sophisticated chemotaxonomic and genetic characterization methods **Annals of Library Science and Documentation** ,1993 *The Standard Periodical Directory* ,2003
