world economy that is characterized by economic progress Even in dynamic settings economic models focus on income growth leaving out the entrepreneurial forces that generate economic progress resulting in the introduction of new goods and services and new production processes Economic analysis focuses on the forces that lead to an economic equilibrium not the forces that produce prosperity This characterization of economic analysis describes a substantial component of economics as it has developed over the past century However there are also economists who have analyzed the factors that lead to an entrepreneurial and innovative economy generating progress rather than equilibrium This volume does not question the value of past research but argues that looking ahead economics should build on its past to focus on factors that create an entrepreneurial and innovative economy that is characterized by progress and prosperity This would make economic analysis more consistent with the remarkable progress and prosperity that characterizes the modern economy This volume lays out a framework for economic analysis that consistently incorporates the real world factors that produce prosperity

**Plotting the contours for India's economic development: Why this could be a role model for other developing nations as well** Sujay Rao Mandavilli, 2024-05-05 In a paper published by us a couple of years ago on Anthropological Economics the year 2020 to be precise we had mooted the idea of trickle up economics as contrasted with the rather more popular and mundane trickle down economics We had argued that the latter would be somewhat dubious iffy inconsistent and non replicable in a wide variety of situations particularly in the case of developing nations We had argued that trickle up economics would actually boost wide ranging economic growth and add to the Gross domestic product in a big way While we never were and still are not big fans of socialism we have always argued and will continue to argue for balanced diversified and equitable economic development models There is a world of difference between the two We had also argued that the economic models pursued by advanced industrial nations will not by and large work in developing nations Thus American style economic conservatism is meaningless in Indian political and economic contexts There are fundamental differences in ground realities between these two different sets of nations It would make eminent sense for the readers of this book to read the aforesaid paper as well as we will not be able to reproduce the contents in this paper in its entirety here many of the proposals advocated and espoused in this paper can also be implemented by developing economies though rather much more slowly We focus only on the meat here

**Disgorgement of Profits** Ewoud Hondius, André Janssen, 2015-08-12 Disgorgement of profits is not exactly a household word in private law Particularly in civil law jurisdictions as opposed to those of the common law the notion is not well known What does it stand for It is best illustrated by examples One of the best known being the British case of *Blake v Attorney General* 2001 1 AC 268 In which a double spy had been imprisoned by the UK government before escaping and settling in the former Soviet Union While there wrote a book on his experiences upon which the UK government claimed the proceeds of the book The House of Lords as it then was allowed the claim on the basis of Blake's breach of his employment contract Other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense In such cases the question arises whether the infringing party should be disgorged of his profits This volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law It does not purport to answer the question whether or not such damages should or should not be awarded It does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions
