Mpumalanga Final Paper 1 Agriculture 2013:

Sustainable Tourism Policy and Planning in Africa Emmanuel Akwasi Adu-Ampong, Albert Nsom Kimbu, 2020-12-17 Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub Saharan Africa and provides some interesting recommendations on how these could be overcome. Tourism is currently growing faster in Sub Saharan Africa SSA and in many other developing regions compared to the rest of the world. Using case examples from different segments of the tourism sector in different country contexts, this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years. It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security, the human capacity management service delivery, local communities and heritage management, climate change and the influence of colonial legacies on tourism policy planning. For many SSA countries, it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm. The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice and examine the extent to which these are shaping the present and their implications for the future sustainability of the tourism sector. Sustainable Tourism Policy and Planning in Africa will be of great value to academics, private and third sector employees to better understand tourism in Sub Saharan Africa. Eight of the chapters were originally published as a special issue of Tourism Planning and Development. These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning.

Multinational Interest & Development in Africa Ilan Bijaoui, 2017-02-17 This book analyzes the current economic situations in African countries at the local, regional and national level. It examines the growing interest from developed and developing countries to invest in Africa and their different reasons for doing so, which aren't always aligned with the interests of African countries. Growth in African GDP has benefitted mainly multinational corporations while the rest of the population remains at the subsistence level, creating a smaller middle class and less opportunity for local businesses to flourish. This book offers potential models of cooperation which could create added value for both African countries and the MNCs investing in them.

Energy Law in South Africa Willemien du Plessis, 2022-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides a systematic approach to legislation and legal practice concerning energy resources and production in South Africa The book describes the administrative organization regulatory framework and relevant case law pertaining to the development application and use of such forms of energy as electricity gas petroleum and coal with attention as needed to the pervasive legal effects of competition law environmental law and tax law A general introduction covers the geography of energy resources sources and basic principles of energy law and the relevant governmental institutions Then follows a detailed description of specific legislation and regulation affecting such factors as documentation undertakings facilities storage pricing procurement and sales transportation transmission distribution and supply of each form of energy Case law intergovernmental cooperation agreements and interactions with environmental tax and competition law are explained Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting South Africa It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law

The Changing Face of Land and Conservation in Post-colonial Africa George Barrett, Shirley Brooks, Jenny Josefsson, Nqobile Zulu, 2016-03-22 The year 2013 marked the 100th anniversary of the 1913 Land Act in South Africa which legalised the violent dispossession and alienation of the African majority from the land It is common cause that the alienation of land for conservation purposes introduced to Africa under colonial rule has continued more or less uninterrupted until today However while nature conservation practices inevitably raise challenging questions relating to land and land use there has thus far been little concentrated effort to bring together scholars working on the land question particularly around issues of land tenure with those whose work focuses on questions of nature construction and the social impacts of conservation in an African context Compiled from research presented at a ground breaking interdisciplinary conference held at Rhodes University in Grahamstown South Africa in 2012 the chapters in this book made their first appearance in a special issue of the Journal of Contemporary African Studies JCAS in July 2013 The book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post colonial Africa into conversation with the well trodden territory of land use and contested land issues on the continent

Anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences the book provides fresh insights into the complex relationship between land and conservation in contemporary Africa

Land, Law and Chiefs in Rural South Africa William Beinart, Rosalie Kingwill, Gavin Capps, 2021-05-01 This edited collection illustrates contestations over land and political authority in South Africa's rural areas focusing on threats to popular rights and how they are being supported Who controls the land and minerals in the former Bantustans of South Africa chiefs the state or landholders Disputes are taking place around the ownership of resources decisions about their exploitation and who should benefit With respect to all of these issues the courts have become increasingly important The contributors to *Land Law and Chiefs in Rural South Africa* capture some of these intense contestations over land law and political authority focussing on threats to the rights of ordinary people History and customary law feature strongly in most disputes and succession to chieftaincy is also frequently disputed Judges have to make decisions in a context where rival claimants to property or office assert their own versions of history and custom The South African constitution recognizes customary law and the courts are attempting to incorporate and develop this branch of jurisprudence as living customary law Lawyers community leaders and academics are called on to assist in researching cases around restitution land rights and customary law The chapters in this collection discuss legal cases and policy directions that have evolved since 1994 Some chapters analyze the increasing power of chiefs in the South African rural areas while others suggest that the courts are giving support to popular rights over land and supporting local democratic processes Contributors record significant pushback from groups that reject traditional authority These political tensions are a central theme of the collection and thus serve as vital case studies in furthering our understanding of rights and restitution in South Africa
