explore the links between livelihood and landscape change including shifts in farming practices and natural resource use and management. The articles, which are all place-based case studies across nine African countries, cover three not necessarily mutually exclusive thematic areas: namely smallholder farming livelihoods under new climate risk (five articles), long-term dynamics of livelihoods and landscape change and future trajectories (two articles), and natural resource management and governance under a changing climate spanning forests, woodlands, and rangelands (four articles). The commonalities, key messages, and research gaps across the 11 articles are presented in a synthesis article. All the case studies pointed to the need for an integrated and in-depth understanding of the multiple drivers of landscape and livelihood change and how these interact with local histories, knowledge systems, cultures, complexities, and lived realities. Moreover, where there are interventions such as new governance systems, REDD, or climate-smart agriculture, it is critical to interrogate what is required to ensure a fair and equitable distribution of emerging benefits.

Agripreneurship and the Dynamic Agribusiness Value Chain Lukman Raimi, Olawale Paul Olatidoye, Thuraya Farhana Hj Said, 2024-11-22. This book provides an insightful exploration of agribusiness entrepreneurship in the dynamic landscape of the global economy. Targeted at agribusiness researchers, agricultural scientists, finance professionals, and consultants, the thematic focus encompasses agricultural and business entrepreneurship, production and consumption dynamics, ethical considerations, impact investments, and disruptive technologies such as Bitcoin, digital ventures, cryptocurrency, and blockchain. Addressing the principles governing innovative business models, the text delves into the multifaceted realm of entrepreneurship in agriculture with a specific emphasis on Sustainable Development Goals (SDGs) and the integration of science, technology, engineering, and mathematics (STEM) in agribusiness. The book underscores the pivotal role of agripreneurs in driving agricultural activities, employing mechanization, irrigation, and modern farming technologies to augment production. It navigates the complexities of rural entrepreneurial activity, considering factors like location, natural resources, social capital, and information technologies. Furthermore, the book investigates the necessity for an entrepreneurial culture in agriculture, citing its potential to alleviate challenges, create employment opportunities, curb rural-to-urban migration, and enhance national income. Through a pragmatic lens, it explores the educational processes required for farmers to develop entrepreneurial and organizational skills, emphasizing the significance of such skills in fostering sustainable development. A comprehensive examination of entrepreneurship in agriculture, this book stands as an indispensable resource for those seeking a nuanced understanding of agribusiness dynamics, the integration of innovative technologies, and the role of entrepreneurship in shaping the future of agriculture.

**Disaster Risk Reduction in Agriculture** Mukhtar Ahmed, Shakeel Ahmad, 2023-11-02. This book is related to disaster risk reduction in agriculture, particularly under changing climate. Climate change refers to significant long-term changes in the global climate. There is unequivocal evidence that Earth is warming at an unprecedented rate. Human activity is the principal cause. The planet's average surface temperature has risen to about 1°C since the late 19th century, and most of the

warming occurred in the past 40 years The years 2016 and 2020 are tied for the warmest year on the record Similarly other evidence of rapid climate change includes warming of oceans shrinking of ice sheets retreating glaciers decreasing snow cover rising of sea level declining arctic sea ice increased frequency of extreme events ocean acidification and loss of biodiversity Hence climate change impacts both extreme weather and slow onset events have impacted several sectors of the national economies and activities in particular agriculture and food production augmented by other challenges be it geopolitical cost of finance or supply chain related and in a time of increased food insecurity Without CO<sub>2</sub> fertilization effective adaptation and genetic improvement each degree Celsius increase in global mean temperature would on average reduce global yields of wheat by 6.0% rice by 3.2% maize by 7.4% and soybean by 3.1% Hence this book is useful as a study material to teach in the field of agriculture and climate change The book is useful for instructors and postgraduate as well as undergraduate students involved in the study of climate change The book also provide guidance to multiple stakeholders to design mitigation and adaptation efforts to climate change and ensure food security in the developing world

**Rural Wage Employment in Developing Countries** Carlos Oya, Nicola Pontara, 2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context

**Development: An Antidote For Poverty And Inequality?** Adrian Sayers, 2022-12-22 For more than a century development discourse and practices have been central to initiatives to change and improve the human condition in response to poverty deprivation oppression and inequality It has informed public policies and shaped the public institutions charged with its implementation and its relations with various forms of associational life Development An Antidote for Poverty and Inequality Reflections on Governance Planning Impact and Accountability in South Africa circa 1994 to 2020 is an attempt to examine the extent to which this has occurred in South Africa an environment that has been impregnated by burgeoning corruption since 1994 the 2008 global economic crises and most recently the COVID 19 pandemic The pursuit of

public policies such as the Reconstruction and Development Programme RDP the National Development Plan NDP as well as other related sectoral policies and legislation all envisaged the development of institutional capacity to facilitate planning and implementation This institutional capacity and resource mobilisation would be enhanced by the formation of partnerships with the private sector/civil society However challenges remain in ascertaining progress through the measurement of performance and the evaluation of impacts nationally and in selected regions and local areas This book documents and outlines these challenges

**Collaborative change: Towards inclusive rural communication services** Lie, R.; Acunzo, M.; Cardey, S.; van de Fliert, E.; Tirol, M. S.; Witteveen, L.; Samonte, P.; (eds.), 2024-11-04 This book addresses the demand for evidence based approaches to rural communication services RCS It presents theoretical foundations of RCS and a series of case studies showcasing the appropriation of media by smallholders and the promotion of enabling policy environments Building on the RCS approach promoted by the Food and Agriculture Organization of the United Nations FAO the 12 contributions included in this book deal with three prominent dimensions 1 the need for theoretical grounding and action research 2 the importance of promoting equality and inclusiveness balancing digital and non digital communication and 3 the importance of addressing capacity infrastructure institutionalization and policy in an integrated manner The book also shows how theoretical contributions inform rural practice and demonstrates how RCS is grounded in and informed by theory In addition it highlights key areas for research capacity development and policy support to operationalize RCS In a nutshell it deepens our understanding of how RCS can be inclusive and drive collaborative change

*Comparative Climate Change Litigation: Beyond the Usual Suspects* Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons

for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation *Operationalising hybrid water law for historical justice* Mukuyu, Patience, van Koppen, Barbara, Jacobs-Mata, Inga, 2022-11-01 Final project report submitted to the Water Research Commission WRC Pretoria South Africa Water Research Commission WRC Sustainable Tourism Policy and Planning in Africa Emmanuel Akwasi Adu-Ampong, Albert Nsom Kimbu, 2020-12-17 Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub Saharan Africa and provides some interesting recommendations on how these could be overcome Tourism is currently growing faster in Sub Saharan Africa SSA and in many other developing regions compared to the rest of the world Using case examples from different segments of the tourism sector in different country contexts this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security the human capacity management service delivery local communities and heritage management climate change and the influence of colonial legacies on tourism policy planning For many SSA countries it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice and examine the extent to which these are shaping the present and their implications for the future sustainability of the tourism sector Sustainable Tourism Policy and Planning in Africa will be of great value to academics private and third sector employees to better understand tourism in Sub Saharan Africa Eight of the chapters were originally published as a special issue of Tourism Planning and Development These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning **Multinational Interest & Development in Africa** Ilan Bijaoui, 2017-02-17 This book analyzes the current economic situations in African countries at the local regional and national level It examines the growing interest from developed and developing countries to invest in Africa and their different reasons for doing so which aren't always aligned with the interests of African countries Growth in African GDP has benefitted mainly multinational corporations while the rest of the population remains at the subsistence level creating a smaller middle class and less opportunity for local businesses to flourish This book offers potential models of cooperation which could create added value for both African countries and the MNCs investing in them *Young Entrepreneurs in Sub-Saharan Africa* Katherine V. Gough, Thilde Langevang, 2016-03-02 Young people in sub Saharan Africa

are growing up in rapidly changing social and economic environments which produce high levels of un and underemployment Job creation through entrepreneurship is currently being promoted by international organizations governments and NGOs as a key solution despite there being a dearth of knowledge about youth entrepreneurship in an African context This book makes an important contribution by exploring the nature of youth entrepreneurship in Ghana Uganda and Zambia It provides new insights into conceptual and methodological discussions of youth entrepreneurship as well as presenting original empirical data Drawing on quantitative and qualitative research conducted under the auspices of a collaborative interdisciplinary and comparative research project it highlights the opportunities and challenges young people face in setting up and running businesses Divided into a number of clear sections each with its own introduction and conclusion the book considers the nature of youth entrepreneurship at the national level in both urban and rural areas in specific sectors including mobile telephony mining handicrafts and tourism and analyses how key factors such as microfinance social capital and entrepreneurship education affect youth entrepreneurship New light is shed on the multi faceted nature of youth entrepreneurship and a convincing case is presented for a more nuanced understanding of the term entrepreneurship and the situation faced by many African youth today This book will be of interest to a wide range of scholars interested in youth entrepreneurship including in development studies business studies youth studies and geography as well as to development practitioners and policy makers The Open Access title has now been added to the Open Access page <http://www.tandfebooks.com/page/openaccess>

Re-conceiving Property Rights in the New Millennium Ben Chigara,2013-03-01 This book constitutes volume two of a two volume examination of development community land issues in Southern Africa Following from volume one Southern African Development Community Land Issues this book considers the possibility of a new sustainable land relations policy for Southern African Development Community States SADC that are currently mired up in land disputes that have become subject of domestic regional and international tribunals Chigara demonstrates that land relations in the SADC have always been and will perhaps remain a matter for constitutional regulation Because constitutional laws are distinctive from other laws only by constitutional design legal contests appear to be the least likely means for settlement in the sub region Only human rights inspired policies that respond to the call for social justice by acknowledging both the current and the underlying contexts to the disputes hold the most potential to resolve these disputes The book recommends efficient pedagogical counter apartheid rule psychological distortions regarding the significance of human dignity PEAPDISH as a pre requisite and corollary to the dismantling of the salient physical legacy of apartheid rule in affected SADC States The book shows that PEAPDISH s potential and benefits would be enormous The book will be of interest to students and researchers of Property and Conveyancing Law Human Rights Law and Land Law

The Changing Face of Land and Conservation in Post-colonial Africa George Barrett,Shirley Brooks,Jenny Josefsson,Nqobile Zulu,2016-03-22 The year 2013 marked the 100th anniversary of the 1913 Land Act in South Africa which legalised the

violent dispossession and alienation of the African majority from the land It is common cause that the alienation of land for conservation purposes introduced to Africa under colonial rule has continued more or less uninterrupted until today However while nature conservation practices inevitably raise challenging questions relating to land and land use there has thus far been little concentrated effort to bring together scholars working on the land question particularly around issues of land tenure with those whose work focuses on questions of nature construction and the social impacts of conservation in an African context Compiled from research presented at a ground breaking interdisciplinary conference held at Rhodes University in Grahamstown South Africa in 2012 the chapters in this book made their first appearance in a special issue of the Journal of Contemporary African Studies JCAS in July 2013 The book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post colonial Africa into conversation with the well trodden territory of land use and contested land issues on the continent Anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences the book provides fresh insights into the complex relationship between land and conservation in contemporary Africa
