Mpumalanga Grade 1 mathematics Literacy 2014:

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

Lesotho Ethiopia and Zimbabwe *Annual Report Mpumalanga* (South Africa). Department of Education, 2017 *Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East* Cynthia S Sunal, Oluseyi Matthew Odebiyi, Kagendo Mutua, 2022-06-01

As the demand for education at all levels has increased so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions have instituted mandates, policies, and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary and secondary schooling, and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large, with some focusing on involving migrants, immigrants, refugees in primary education, while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning; online learning, as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult-to-reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging, if not problematic.

Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East is Book IX of the series *Research on Education in Africa, the Caribbean, and the Middle East*. Chapters document, describe, and/or raise critical issues and/or questions resulting from government policies, mandates, and frameworks intended to make available public education to an ever-growing populace while at the same time being mindful of improving quality of education being available to an increasingly diverse populace. *Annual Performance Plan Mpumalanga* (South Africa). Department of Education, 2016
