Nanny State By David Harsanyi:

Nanny State David Harsanyi, 2007-09-18 When did we lose our right to be lazy unhealthy and politically incorrect Move over Big Brother An insidious new group has inserted itself into American politics They are the nannies not the stroller pushing set but an invasive band of do gooders who are subtly and steadily stripping us of our liberties robbing us of the inalienable right to make our own decisions and turning America into a nation of children As you read this countless busybodies across the nation are rolling up their sleeves to do the work of straightening out your life Certain Massachusetts towns have banned school yard tag San Francisco has passed laws regulating the amount of water you should use in dog bowls The mayor of New York City has french fries and doughnuts in his sights In some parts of California smoking is prohibited outside The government under pressure from the nanny minority is twisting the public's arm into obedience Playground police food fascists anti porn crusaders whether they're legislating morality or wellbeing nannies are popping up all over America In the name of health safety decency and shudder good intentions these ever vigilant politicians and social activists are dictating what we eat where we smoke what we watch and read and whom we marry Why do bureaucrats think they know what's better for us than we do And are they selectively legislating in the name of political expediency For instance why do we ban mini motorbikes responsible for five deaths each year and not skiing which accounts for fifty deaths each year Why is medical marijuana a substance yet to claim a single life banned and not aspirin which accounts for about 7 600 deaths Exhaustively researched sharply observed and refreshingly lucid Nanny State looks at the myriad ways we are turning the United States into a soulless and staid nation eroding not only our personal freedoms but our national character

Polarization and the Politics of Personal Responsibility Mark D. Brewer, Jeffrey M. Stonecash, 2015 Contemporary American politics is highly polarized and it is increasingly clear that this polarization exists at both the elite and mass levels What is less clear is the source of this polarization Social issues are routinely presented by some as the driver of polarization while others point to economic inequality and class divisions Still others single out divisions surrounding race and ethnicity or gender or religion as the underlying source of the deep political divide that currently exists in the United States All of these phenomena are undoubtedly highly relevant in American politics and it is also beyond question that they represent significant cleavages within the American polity We argue however that disagreement over a much more fundamental matter lies at the foundation of the polarization that marks American politics in the early 21st century That matter is personal responsibility Some Americans fervently believe that an individual's lot in life is primarily if not exclusively his or her own responsibility Opportunity is widespread in American society and individuals succeed or fail based on their own talents and efforts Society greatly benefits from such an arrangement and as such government policies should support and reward individual initiative and responsibility Other Americans see personal responsibility while fine in theory as an unjust organizing principle for contemporary American society For these Americans success or failure in life is far too often not the

result of personal effort but of large forces well beyond the control of the individual Opportunity is not widespread and is by no means equally available to all Americans In light of these basic facts of American life it is the responsibility of the state to step in and implement policies that alleviate inequality and assist those who fail by no fault of their own These basic differences surrounding the idea of personal responsibility are what separate Republicans and Democrats conservatives and liberals in contemporary American politics

Konrad H. Jarausch, 2024-10-29 A bracing corrective to predictions of the European Union's decline by a leading historian of modern Europe Is the European Union in decline Recent history from the debt and migration crises to Brexit has led many observers to argue that the EU's best days are behind it Over the past decade right wing populists have come to power in Poland Hungary and beyond many of them winning elections using strident anti EU rhetoric At the same time Russia poses a

continuing military threat and the rise of Asia has challenged the EU's economic power. But in *Embattled Europe*, renowned European historian Konrad Jarausch counters the prevailing pessimistic narrative of European obsolescence with a rousing yet realistic defense of the continent, one grounded in a fresh account of its post-1989 history and an intimate understanding of its twentieth-century horrors. An engaging narrative and probing analysis, *Embattled Europe* tells the story of how the EU emerged as a model of democratic governance and balanced economic growth, adapting to changing times while retaining its value system. The book describes the EU's admirable approach to the environment, social welfare, immigration, and global competitiveness. And it presents underappreciated European success stories, including Denmark's transition to a green economy, Sweden's restructuring of its welfare state, and Poland's economic miracle. *Embattled Europe* makes a powerful case that Europe, with its peaceful foreign policy, social welfare, solidarity, and environmental protection, offers the best progressive alternative to the military adventurism and rampant inequality of plutocratic capitalism and right-wing authoritarianism.

Society, Law, and Culture in the Middle East Dror Ze'evi, Ehud R. Toledano, 2015-10-29. *Society, Law, and Culture in the Middle East: Modernities in the Making* is an edited volume that seeks to deepen and broaden our understanding of various forms of change in Middle Eastern and North African societies during the Ottoman period. It offers an in-depth analysis of reforms and gradual change in the longue durée, challenging the current discourse on the relationship between society, culture, and law. The focus of the discussion shifts from an external to an internal perspective as agency transitions from the West to local actors in the region. Highlighting the ongoing interaction between internal processes and external stimuli and using primary sources in Arabic and Ottoman Turkish, the authors and editors bring out the variety of modernities that shaped south-eastern Mediterranean history. The first part of the volume interrogates the urban elite household, the main social, political, and economic unit of networking in Ottoman societies. The second part addresses the complex relationship between law and culture, looking at how the legal system conceptually and practically undergirded the socio-cultural aspects of life in the Middle East. *Society, Law, and Culture in the Middle East* consists of eleven chapters written by well-established and younger scholars working in the field of Middle East and Islamic Studies. The editors, Dror Ze'evi and Ehud R. Toledano, are both leading historians who have published extensively on Middle Eastern societies in the Ottoman and post-Ottoman periods.

From Label to Table Xaq Frohlich, 2023-10-17. How did the Nutrition Facts label come to appear on millions of everyday American household food products? As Xaq Frohlich reveals, this legal, scientific, and seemingly innocuous strip of information can be a prism through which to view the high-stakes political battles and development of scientific ideas that have shaped the realms of American health, nutrition, and public communication. By tracing policy debates at the U.S. Food and Drug Administration, Frohlich describes the emergence of our present information age in food and diet markets and examines how powerful government offices inform the public about what they consume. *From Label to Table* explores evolving popular ideas about food, diet, and responsibility for health that have influenced what goes on the Nutrition Facts

label and who gets to decide that
