

In the nanotech domain, architects and manufacturing tools are forced to make fundamental decisions. Therefore, they require advanced techniques in order to function properly. Designing these buildings presents a multitude of challenges to architectural and engineering design teams, and reflects a growing trend to develop advanced techniques to assist earlier work in the process. This approach presents the state of emerging questions and unanswered problems in the design of nanotechnology research centers and discusses the array of technical and human factors that emerge in the design research facilities supporting nanotech science and technology. Divided into three parts, this monograph starts in the first part by defining nanotechnology and listing of some scientific terms and basic concepts. The second part presents the structure and design elements required in constructing nanotechnology research buildings. The third part provides and discusses how nanotech nanotechnology and nanoscience research centers.
