National Freshman Attitudes Report

Based on their own self-perceptions, how well prepared—and motivated—are today's undergraduates when they enter college?

This report describes the self-reported attitudes and motivations of first-year college students nationally at the beginning of their undergraduate experience, based on a 100-item attitudinal survey administered in the summer and fall of 2007. Among the findings:

- Nearly half of entering students arrived at college lacking confidence in their math and science skills.
- Entering first-generation students arrived with similarly low levels of academic confidence as non-first-generation students, but they worried more about finances.
- One-third of entering Asian students reported that they "become very confused" when trying to choose an occupation.
- Ninety-five percent of entering first-year students arrived highly motivated to complete a degree, while 74 percent wanted assistance in knowing how to prepare for exams and 66 percent indicated a desire for career guidance.

This last finding on motivation, when juxtaposed against national graduation data, highlights a sobering disparity: Although the vast majority of today's first-year students arrive at college highly motivated to complete their degrees, only half of them are likely to accomplish their goal. The Dumbest Generation Grows Up Mark Bauerlein, 2022-02-01 From Stupefied Youth to Dangerous Adults Back in 2008 Mark Bauerlein was a voice crying in the wilderness As experts greeted the new generation of Digital Natives with extravagant hopes for their high tech future he pegged them as the Dumbest Generation Today their future doesn't look so bright and their present is pretty grim The twenty somethings who spent their childhoods staring into a screen are lonely and purposeless unfulfilled at work and at home Many of them are even suicidal The Dumbest Generation Grows Up is an urgently needed update on the Millennials explaining their not so quiet desperation and more important the threat that their ignorance poses to the rest of us Lacking skills knowledge religion and a cultural frame of reference Millennials are anxiously looking for something to fill the void Their mentors have failed them Unfortunately they have turned to politics to plug the hole in their souls Knowing nothing about history they are convinced that it is merely a catalogue of oppression inequality and hatred Why they wonder has the human race not ended all this injustice before now And from the depths of their ignorance rises the answer Because they are the first ones to care All that is needed is to tear down our inherited civilization and replace it with their utopian aspirations For a generation unacquainted with the constraints of human nature anything seems possible Having diagnosed the malady before most people realized the patient was sick Mark Bauerlein surveys the psychological and social wreckage and warns that we cannot afford to do this to another generation
