Debates in Macroeconomics from the Great Depression to the Long Recession Arie Arnon, 2022-05-06 This book assesses major schools of thought in macroeconomic theory between the Great Depression and the Long Recession focusing on their analysis of cycles crises and macro policy It explores the road from the dominance of Keynesian ideas to those of New Classical Macroeconomics NCM toward the end of the millennium The book covers the early influential work of Knut Wicksell the economic debates of the 1930s with core contributions from John Maynard Keynes and Friedrich von Hayek the rise of Keynesianism in the 1950s and its decline since the 1970s the rise of Monetarism in the 1960s and NCM s subsequent rise to prominence Finally the book outlines how macroeconomics has evolved from its birth in the 1930s as a theory separate from microeconomics resulting in a split between macro and micro

theories and ended up with a new hegemonic paradigm based on microfoundations The ensuing policy thinking witnessed a transformation from active macro policy after the Great Depression to a far more passive macro policy during the last quarter of the twentieth century which may have contributed to missing the signs of the impending Long Recession of 2008 When the 2008 crisis struck macroeconomists were caught with models that were theoretically elegant yet inappropriate to the needs of the moment A broader historical perspective may have prevented the jettisoning of Keynesian models that had proved useful in the past and might have done so again This highly readable book by Arie Arnon is a wonderful antidote to economists short time horizon and contributes mightily to restore the profession s collective memory of the diversity of ideas within macroeconomics Professor Dani Rodrik Harvard Kennedy School Examination Papers ... Containing the Papers for the Mechanical Sciences Tripos University of Cambridge,1926 *A Method for Recognizing Fatigue Driving Based on Dempster-Shafer Theory and Fuzzy Neural Network* WenBo Zhu, HuichengYang,Yi Jin,Bingyou Liu, This study proposes a method based on Dempster Shafer theory DST and fuzzy neural network FNN to improve the reliability of recognizing fatigue driving This method measures driving states using multifeature fusion First FNN is introduced to obtain the basic probability assignment BPA of each piece of evidence given the lack of a general solution to the definition of BPA function Second a modified algorithm that revises conflict evidence is proposed to reduce unreasonable fusion results when unreliable information exists **Provisional Cities** Renata Tyszczyk,2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities *Big Data and Information Theory* Jiuping Xu,Syed Ejaz Ahmed,Zongmin Li,2022-06-01 Big Data and Information Theory are a binding force between various areas of knowledge that allow for societal advancement Rapid development of data analytic and information theory allows companies to store vast amounts of information about production inventory service and consumer activities More powerful CPUs and cloud computing make it possible to do complex optimization instead of using heuristic algorithms

as well as instant rather than offline decision making The era of big data challenges includes analysis capture curation search sharing storage transfer visualization and privacy violations Big data calls for better integration of optimization statistics and data mining In response to these challenges this book brings together leading researchers and engineers to exchange and share their experiences and research results about big data and information theory applications in various areas This book covers a broad range of topics including statistics data mining data warehouse implementation engineering management in large scale infrastructure systems data driven sustainable supply chain network information technology service offshoring project issues online rumors governance preliminary cost estimation and information system project selection The chapters in this book were originally published in the journal International Journal of Management Science and Engineering Management *IBPS PO Past Solved Papers 2012 to 2016 Preliminary and Main Exam* Disha Experts, 2017-08-18 IBPS PO Past Solved Papers 2012 to 2016 Preliminary and Main Exam covers past 5 years solved papers **Co-Designing Science in Africa** UNESCO, 2019-06-28 Shaping the Future of Biological Education Research Konstantinos Korfiatis, Marcus Grace, Marcus Hammann, 2023-12-01 This open access volume is a collection of full papers based on the peer reviewed presentations accepted for the European Researchers in Didactics of Biology ERIDOB 2022 conference ERIDOB aims to bring together researchers in didactics of Biology from Europe and around the world to share and discuss their research work and results It is the only major international conference whose focus lies exclusively on biology education research and all the papers are written by international researchers from across Europe and beyond which report on a range of contemporary biology education research projects They are all entirely new papers describing new research in the field Each paper has been peer reviewed by experienced biology education researchers and the members of the ERIDOB Academic Committee The selected papers are collated within the following categories of biology education Teaching Strategies and Learning Environments Students Knowledge Conceptions Values Attitudes and Motivation Outdoor and Environmental Education Biology Teachers Professional Development By providing a collection of new research findings from many countries this book is a great resource for researchers and practitioners such as school college and university biology teachers around the world It is useful for training biology teachers and therefore valuable to teacher training institutions *Rock Mechanics for Natural Resources and Infrastructure Development - Full Papers* Sergio A.B. of biologization i.e. how the worldviews of the general public in Sweden are shaped by biological science. Is there a gap between Swedes in general and the perceptions of Swedish clergy? The answer is based on sociological studies on science and religion in Sweden and the United States. Furthermore, the book contains a study of Swedish theologians from Nathan Söderblom to the present Archbishop Antje Jackelén and their shifting understanding of the relation between science and religion. The philosophical aspects of this relation are given special consideration. What models of the relation inform the contemporary scholarly discussion? Are science and religion in conflict, separate, or in mutual creative interaction? *Climate Change Adaptation in Eastern Europe* Walter Leal Filho, Goran Trbic, Dejan Filipovic, 2018-12-15. This book focuses on managing risks and building resilience to climate change, showcasing experiences from research field projects and best practices to foster climate change adaptation in Eastern Europe that can be implemented elsewhere. Climate change affects countries in Eastern Europe, i.e. the Western Balkans and Southeast Europe, in a variety of ways. Apart from severe floods, there are reports of decreasing water reserves in the southern regions and of gradual changes in biodiversity and agricultural production. In the South Caucasus area, for instance, climate change models project a decline in precipitation and suggest that it will continue to become drier this century. Many Eastern European countries, especially the non-EU ones, have weak national climate policies and transboundary collaborations, as well as limited public engagement in matters related to climate change. As a result, climate change poses a serious threat to their economic stability and development and to the sustainable development of the region. The above state of affairs illustrates the need for a better understanding of how climate change influences Eastern Europe and for the identification of processes, methods, and tools that may help the countries and the communities in the region to adapt. There is also a perceived need to showcase successful examples of how to cope with the social, economic, and political problems posed by floods and droughts in the region, especially ways of increasing the resilience of agriculture systems and of communities. Addressing this need, the book presents papers written by scholars, social practitioners, and members of government agencies involved in research and/or climate change projects in Eastern Europe. Civil, Architecture and Environmental Engineering Volume 2 Jimmy C.M. Kao, Wen-Pei Sung, 2017-09-19. The 2016 International Conference on Civil Architecture and Environmental Engineering (ICCAE 2016), November 4-6, 2016, Taipei, Taiwan, is organized by China University of Technology and Taiwan Society of Construction Engineers, aimed to bring together professors, researchers, scholars, and industrial pioneers from all over the world. ICCAE 2016 is the premier forum for the presentation and exchange of experience, progress, and research results in the field of theoretical and industrial experience. The conference consists of contributions promoting the exchange of ideas between researchers and educators all over the world.
