German Foreign Policy After Unification 1992004 Paperback:

German Media and National Identity Sanna Inthorn, 2007 Fascination with what makes the Germans tick has produced a vast range of texts that explore German postwar politics culture and society Yet within this considerable body of work there is a paucity of academic analysis that acknowledges the role of media discourse in the representation and construction of German identity This book makes an important contribution to the study of German national identity by offering a detailed and large scale academic analysis of how German media discourse between 1998 and 2005 represents German national identity It brings together a variety of case studies European integration citizenship and immigration sports and consumption It makes the case for the role of popular culture in the discursive formation of national identity and demonstrates that the nation is constructed against political and non political subjects By looking at a variety of topic contexts this book identifies a master narrative of the German nation It tells the story of a nation that has its roots firmly in the memory of National Socialism and constructs ethnocentric nationalism as taboo Yet at the same time it cannot escape the past as it harbors racist images of self and other This is an important book for collections in European studies and media studies as well as scholars engaged in studying the impact of media on culture This book demonstrates that reports of the death of the nation state are without any doubt exaggerated The particular complex of discourses analysed here was and is only present in Germany It could not be found in Germany's German speaking neighbours such as Austria or Switzerland or indeed anywhere else While the influence of globalisation is undeniable the nation state and its media remain a key location for the negotiation of national identity and much more This wide ranging and engagingly written book offers us an exceptional insight into that process Professor Hugh O'Donnell Glasgow Caledonian University

The Life and Death of International Treaties Jeffrey S. Lantis, 2009 This book represents one of the first comparative studies of international treaty ratification processes in multiple issue areas It employs the comparative case study method drawing on original research elite interviews and discursive analyses of government documents in Europe Australia and North America

Fear and the Making of Foreign Policy Raymond Taras, 2015-03-24 This is a book about conflicts and fears how domestic reasons are drawing countries in Europe into international events Raymond Taras explains why France Poland and Sweden have become engaged in outside conflicts and tells the story of when and why

European Security in the Twenty-First Century Adrian Hyde-Price, 2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of

international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy

European Security in the Twenty First Century will appeal to students and scholars of international relations European politics and security studies *The Budget of the European Union and German European Policy* Peter Becker, 2024-07-18 This book presents in detail the negotiations on the budget of the European Union which take place every seven years and discusses the central elements of this European budgetary system The author explains the various interests and the resulting distributional conflicts traces the genesis of this highly complex process discusses the system of inflows and reflows and sheds particular light on German European policy

"We are the Mods" Christine Jacqueline Feldman, 2009 Drawing on archival research oral history interviews and participant observation this examination of the adoption and adaptation of Mod style across geographic space also maps its various interpretations over time from the early 1960s to the present The book traces the Mod youth culture from its genesis in the dimly lit clubs of London's Soho where it began as a way for young people to reconfigure modernity after the chaos of World War II to its contemporary country specific expressions By examining Mod culture in the United States Germany and Japan alongside the United Kingdom *We Are the Mods* contrasts the postwar development of Mod in those countries that lost the war with those that won The book illuminates the culture's fashion music iconography and gender aesthetics to create a compelling portrait of a transnational subculture Book Jacket

After the Berlin Wall K. Gerstenberger, J. Braziel, 2011-11-21 Twenty years after its fall the wall that divided Berlin and Germany presents a conceptual paradox on one hand Germans have sought to erase it completely on the other it haunts the imagination in complex and often surprising ways Strategic Culture, Securitisation and the Use of Force Wilhelm Mirow, 2016-04-14 This book investigates and explains the extent to which different liberal democracies have resorted to the use of force since the 9 11 terrorist attacks The responses of democratic states throughout the world to the September 2001 terrorist attacks have varied greatly This book analyses the various factors that had an impact on decisions on the use of force by governments of liberal democratic states It seeks to explain differences in the security policies and practices of Australia Canada France Germany and the UK regarding the war in Afghanistan domestic counterterrorism measures and the Iraq War To this end the book combines the concepts of strategic culture and securitisation into a theoretical model that disentangles the individual structural and agential causes of the use of force by the state and sequentially analyses the impact of each causal component on the other It argues that the norms of a strategic culture shape securitisation processes of different expressions which then bring about distinct modes of the use of force in individual security policy decisions While governments can also deviate from the constraints of a strategic culture this is likely to encounter a strong reaction from large parts of the population which in turn can lead to a long term change in strategic culture This book will be of much interest to students of strategic culture securitisation European politics security studies and IR in general *Homelands* Nadav G. Shelef, 2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation's homeland

whereas in other places conflict continues despite or even because of division of territory In Homelands Nadav G Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict Homelands also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations *History and Foreign Policy in France and Germany* Ulrich Krotz, 2015-08-11 Why do states similar in size resources and capabilities significantly differ in their basic orientations and actions across major domains in foreign policy security and defense This book addresses this important question by analyzing the major differences between the foreign policies of France and Germany over extended periods of time **German Culture, Politics, and Literature Into the Twenty-first Century** Stuart Taberner, Paul Cooke, 2006 This volume features sixteen thought provoking essays by renowned international experts on German society culture and politics that together provide a comprehensive study of Germany's postunification process of normalization Essays ranging across a variety of disciplines including politics foreign policy economics literature architecture and film examine how since 1990 the often contested concept of normalization has become crucial to Germany's self understanding Despite the apparent emergence of a new Germany the essays demonstrate that normalization is still in question and that perennial concerns notably the Nazi past and the legacy of the GDR remain central to political and cultural discourses and affect the country's efforts to deal with the new challenges of globalization and the instability and polarization it brings This is the first major study in English or German of the impact of the normalization debate across the range of cultural political economic intellectual and historical discourses Contributors Stephen Brockmann Jeremy Leaman Sebastian Harnisch and Kerry Longhurst Lothar Probst Simon Ward Anna Saunders Annette Seidel Arpac Chris Homewood Andrew Plowman Helmut Schmitz Karoline Von Oppen William Collins Donahue Katharine Sch del Stuart Taberner Paul Cooke Stuart Taberner is Professor of Contemporary German Literature Culture and Society and Paul Cooke is Senior Lecturer in German Studies both at the University of Leeds **The War on Terror and the Growth of Executive Power?** John E. Owens, Riccardo Pelizzo, 2010-06-21 The 9 11 attacks on New York and Washington prompted a global war on terror that led to a significant shift in the balance of executive legislative power in the United States towards the executive at the expense of the Congress In this volume seasoned scholars examine the extent to which terrorist threats and counter terrorism policies led uniformly to the growth of executive or Government power at the expense of legislatures and parliaments in other political systems including those of Australia Britain Canada Indonesia Israel Italy and Russia The contributors question whether the crises created by 9 11 and subsequent attacks led inexorably to executive strengthening at the expense of legislatures and parliaments The research reported finds that democratic forces served to mitigate changes to the balance of legislative and executive power to varying degrees in different political systems

This book will be of interest to students and researchers of Comparative Government Politics and International Politics

International Relations Theories Timothy Dunne, Milja Kurki, Steve Smith, 2007 This cutting edge textbook provides a comprehensive introduction to international relations theory Arguing that theory is central to explaining the dynamics of world politics it includes a wide variety of theoretical positions from the historically dominant traditions to powerful critical voices since the 1980s The editors have brought together a team of international contributors each specializing in a different theory The contributors explain the theoretical background to their positions before showing how and why their theories matter The book opens up space for analysis and debate allowing students to decide which theories they find most useful in explaining and understanding international relations

Germany and the Baltic Problem After the Cold War Kristina Spohr Readman, 2004-06-10 Questions how a unified Germany will use its great power status Draws on numerous confidential interviews with key political actors and on unprecedented access to still classified material

Strategy in the Contemporary World John Baylis, 2007 Provides a coverage of issues of war and peace such as terrorism irregular warfare and weapons of mass destruction This work contains a set of reflections on the role of military power in the contemporary world It analyzes conflicts from Afghanistan to the Iraq War and looks at the debates about the lessons that can be learned from these wars

Parting Ways Stephen F. Szabo, 2004-09-30 Germany and the United States entered the post 9 11 era as allies but they will leave it as partners of convenience or even possibly as rivals The first comprehensive examination of the German American relationship written since the invasion of Iraq Parting Ways is indispensable for those seeking to chart the future course of the transatlantic alliance In early 2003 it became apparent that many nations including close allies of the United States would not participate in the U S led coalition against Iraq Despite the high profile tension between the United States and France some of the most bitter opposition came from Germany marking the end not only of the German American special relationship but also of the broader transatlantic relationship s preeminence in Western strategic thought Drawing on extensive research and personal interviews with decisionmakers and informed observers in both the United States and Germany Stephen F Szabo frames the clash between Gerhard Schröder and George W Bush over U S policy in Iraq in the context of the larger changes shaping the relationship between the two countries Szabo considers such longer term factors as the decreasing strategic importance of the U S German relationship for each nation in the post cold war era the emergence of a new German identity within Germany itself and a U S foreign policy led by what is arguably the most ideological administration of the post World War II era

United Germany Konrad H. Jarausch, 2013-07-01 Since the attempt to unite two parts of a country divided for four decades yielded contradictory results this volume provides a balance sheet of the successes and failures of German unification during the first quarter century after the fall of the Wall Five themes ranging from the transfer of political institutions to the economic crisis from the social upheaval for women s movements to the cultural efforts at interpretation and the changes in foreign policy have been chosen to illustrate the

complexity of the process The contributors represent a broad interdisciplinary mix of political scientists historians and literary scholars Because personal experiences tend to color scholarly judgments they are drawn from West Germany East Germany and the United States This collection is the most up to date and comprehensive assessment of the political social and intellectual consequences of the efforts to regain German unity Human Rights and Structural Adjustment M. Rodwan Abouharb, David Cingranelli, 2007-12-13 Structural adjustment has been a central part of the development strategy for the third world Loans made by the World Bank and the IMF have been conditional on developing countries pursuing rapid economic liberalization programmes as it was believed this would strengthen their economies in the long run M Rodwan Abouharb and David Cingranelli argue that conversely structural adjustment agreements usually cause increased hardship for the poor greater civil conflict and more repression of human rights therefore resulting in a lower rate of economic development Greater exposure to structural adjustment has increased the prevalence of anti government protests riots and rebellion It has led to less respect for economic and social rights physical integrity rights and worker rights but more respect for democratic rights Based on these findings the authors recommend a human rights based approach to economic development **German Politics and Society** ,2007 **Introduction to Political Psychology** Martha L. Cottam, Elena Mastors, Thomas Preston, Beth Dietz, 2004-04-26 The first comprehensive textbook on political psychology this user friendly volume explores the psychological origins of political behavior Using psychological concepts to explain types of political behavior the authors introduce a broad range of theories and cases of political activity to illustrate the behavior The book examines many patterns of political behaviors including leadership group behavior voting race ethnicity nationalism political extremism terrorism war and genocide Text boxes highlight current and historical events to help students see the connection between the world around them and the concepts they are learning Examples highlight a variety of research methodologies used in the discipline such as experimentation and content analysis The Political Being is used throughout to remind the reader of the psychological theories and concepts to be explored in each chapter Introduction to Political Psychology explores some of the most horrific things people do to one another for political purposes as well as how to prevent and resolve conflict and how to recover from it The goal is to help the reader understand the enormous complexity of human behavior and the significant role political psychology can play in improving the human condition Designed for upper division courses on political psychology or political behavior this volume also contains material of interest to those in the policymaking community
