Bilingualism Maya Libben, Mira Goral, Gary Libben, 2017-12-15 In the world today bilingualism is more common than monolingualism. Thus the default mental lexicon may in fact be the bilingual lexicon. More than ever social and technological innovation have created a situation in which lexical knowledge may change dramatically throughout an individual's lifetime. This book offers a new perspective for the understanding of these phenomena and their consequences for the representation of words in the mind and brain. Contributing authors are leaders in the field who provide a re-analysis of key assumptions and a re-focusing of research. They bring new insights and new findings that advance the understanding of both bilingualism and the mental lexicon. This volume serves to generate new directions and advances in bilingualism research. *Vocabulary in the Foreign Language Curriculum* James Milton, Oliver Hopwood, 2022-11-14 Written by experts in the field, this book explains the principles of effective vocabulary instruction for the modern language classroom. While many language classrooms rely on practices which can be outdated, idiosyncratic, or ill advised, this book overviews the research and background necessary to successfully integrate vocabulary instruction into the curriculum in a systematic way. Starting with the common gaps in vocabulary instruction, Milton and Hopwood demonstrate how students' development of a large communicative lexicon with an understanding of word structure and collocations is an essential component of language instruction. The book addresses goal setting, curriculum design, word selection, how words are learned, learning in and outside of the classroom, and more. It also addresses common myths about teaching vocabulary in the United Kingdom and around the world. This comprehensive text fills an important gap in the literature and is ideal for undergraduate and postgraduate courses in world language, foreign language methods, and language methods courses. **Multilingual Lexical Recognition in the Mental Lexicon of Third Language Users** Weronika Szubko-Sitarek, 2014-10-07 The monograph constitutes an attempt to demonstrate that trilinguals should be considered as learners and speakers in their own right, as opposed to L2 learners, with a view to enumerating consequences this would bring to third or additional language teaching. Its theoretical part offers an insight into the structure of the multilingual mental lexicon, which is a product of the interplay of a whole array of cross-linguistic factors in the minds of multilingual speakers. The empirical part reports the findings of an empirical study which aimed to investigate connections which are formed between multiple languages in a multilingual mind. All the aspects analyzed in the experiments are part of a broader question of how multilinguals make their lexical decisions, and more specifically, how they recognize words from different languages. The book closes with the discussion of the role of the obtained results for multilingual didactics, as well as some possible areas for future research. **Exploring Language Frameworks** Evelina D. Galaczi, Cyril J. Weir, 2013-01-10 This book explores the impact of language frameworks on learning, teaching, and assessment, viewed from the perspective of policies, procedures, and challenges. It brings together a selection of edited papers based on presentations given at the 4th International Conference of the Association of Language Testers in Europe (ALTE) held in Kraków, Poland, in

July 2011 The selected papers focus on the conference's core themes as follows: the effect of frameworks on teaching learning and assessment; the value of frameworks for teachers, learners and language policymakers; the contribution of frameworks towards describing particular languages. **Babel**, 1956 *Translation and Own-language Activities* Philip

Kerr, 2014-03-27 *Translation and Own language Activities* provides structured practical advice and guidance for using students' own languages within the ELT classroom. *Translation and Own language Activities* provides structured practical advice and guidance for using students' own languages within ELT classrooms. Taking into account both the growing interest and concerns about use of translation in English lessons, the book presents effective ways of integrating carefully chosen activities covering themes such as tools, language skills, language focus and techniques. The practical activities range from using bilingual dictionaries to translating long texts with a number of tasks, drawing on easy-to-use web tools. The book also considers the relationship between translation and intercultural understanding. **Universal or Diverse Paths to English**

Phonology Ulrike Gut, Robert Fuchs, Eva-Maria Wunder, 2015-03-30 The book is concerned with the acquisition of English phonology, both segmental and suprasegmental, by learners of English as a second language, as a third language, and by speakers of a postcolonial new variety of English. It focuses on the acquisition process and factors influencing it, based on insights from all three disciplines. **Resources in Education**, 1981 *Behavioral and Neurophysiological Approaches to Code-Switching and Language Switching* Jeanine Treffers-Daller, Esther Ruigendijk, Julia Elisabeth Hofweber, 2021-05-03

Foreign language learning is a progressive endeavor. Whatever the method, the learner should advance from one point to another, constantly improving. Growing proficiency entails growing language content. Content is complex, displaying many dimensions. Syllabus designers, textbook authors and teachers often struggle with the monitoring of content. Computer-assisted systemization helps to handle it in a manageable framework. Besides inventorying content, it ensures more balanced selections, calculated progression and controlled reiteration of previously learned material. It gauges the usability of authentic material in relation to the level attained. During the teaching process, it allows the instant selection of items needed for a communicative situation, focus on forms or particular exercises.
