Chia,Ling-Wei Chen,Jun Shi Lai,Shan Xuan Lim,2023-12-05 To date limited evidence suggests that maternal preconception and pregnancy dietary patterns are associated with reduced risks of adverse maternal and child health outcomes such as gestational diabetes mellitus and preterm birth However there are insufficient studies examining preconception and pregnancy dietary patterns on birth weight outcomes such as gestational age birth weight for any conclusion to be made Additionally there is a relative paucity of studies investigating preconception postpartum and beyond postpartum dietary patterns Recent research has advanced from examining each modifiable lifestyle factor singly e g diet physical activity smoking towards a holistic approach of examining multiple lifestyle factors using composite healthy lifestyle scores Two large scale mother offspring cohorts in Ireland and the United States have shown that adherence to a healthy lifestyle during pregnancy and beyond pregnancy is associated with reduced risks of adverse offspring birth outcomes and childhood obesity These findings are consistent with data obtained from cross sectional studies based in China and Tanzania      **Our Own Devices** Edward Tenner,2004-06-08 This delightful and instructive history of invention shows why National Public Radio dubbed Tenner the philosopher of everyday technology Looking at how our inventions have impacted our world in ways we never intended or imagined he shows that the things we create have a tendency to bounce back and change us The reclining chair originally designed for brief healthful relaxation has become the very symbol of obesity The helmet invented for military purposes has made possible new sports like mountain biking and rollerblading The typewriter created to make business run more smoothly has resulted in wide spread vision problems which in turn have made people more reliant on another invention eyeglasses As he sheds light on the many ways inventions surprise and renew us Tenner considers where technology will take us in the future and what we can expect from the devices that we no longer seem able to live without
