Nerad,1996 You re no idiot of course You keep your projects on budget at work shop around to find the best prices on groceries and clothing and even manage to sock away money for your kids college tuition But when it comes to wheeling and dealing to buy a car you feel like someone else is in the driver s seat Don t be taken for a ride The Complete Idiot s Guide to Buying or Leasing a Car helps you learn the techniques you need to drive away in the car you want at the price you can afford Feel confident about asking questions and bargaining even when you have to say no to a salesperson In this Complete Idiot s Guide you get **Questions When Buying a Car** Stephen Edwards,2006-09 50 plus one Questions When Buying a Car is the perfect self help guide for every potential car buyer whether you are buying new or pre owned How do you tell if a used car was in an accident or hurricane What features on a new car provide good values Are the miles per gallon as advertised really true Buying a car is often the second largest purchase you are likely to make This book could save you hundreds of thousands of dollars over the many cars you will buy in your lifetime Learn how to compare various makes and models of cars which cars hold their value the longest should you have a used car inspected before buying is it better to buy used from an individual or dealer are places like www cars com better than the local dealer should you buy a car after the lease is finished and more **Foundations for Efficient Web Service Selection** Qi Yu,Athman Bouguettaya,2009-09-02 Foundations for Efficient Web Service Selection describes the foundational framework for efficient Web service selection It lays out a theoretical underpinning for the design of models and algorithms for searching and optimizing access to Web services Excerpts from Prof Fabio Casati s foreword This excellent book looks at the search problem from a broader perspective Instead of narrowing down on a specific aspect or subproblem of service search it dissects and analyzes the fundamental problems in search and presents concrete applicable solutions as

well as the theoretical foundations behind them One aspect I found particularly significant in the book is the mind shift it generates from thinking about service modeling for the sake of supporting deployment or invocation to modeling for supporting search This design for search approach is exactly what we do when we design databases because search is what we worry about in that case and there is no reason why this shouldn't be the case for services if we want services to be searchable with a similar effectiveness
