Negotiated Breastfeeding Caroline Chautems, 2021-10-18 Based on an ethnography of postpartum consultations by independent midwives in Switzerland this book produces unique insights into home birth parents breastfeeding journey from the first hours after birth to weaning Considered the natural continuity of childbirth without intervention breastfeeding is a fundamental component of the holistic continuous and individualised care independent midwives provide as they engage with parents in a shared construction of meaning around breastfeeding This book offers new perspectives on the conceptualisation of breastfeeding as a shared process Parents in collaboration with their midwife and baby are jointly constructing negotiated breastfeeding As the child grows and develops

questions arise regarding the management of risks the construction of the lactating body and the body work required and the perception of breastfeeding as a means of communication with the child consistent with a child centred approach to parenting Fostering a reflection on the contrasts and similarities between the marginal model of holistic care and the dominant biomedical model this book sheds light on issues of a broader scope the relationship to health risks and health promotion gender inequalities regarding parental roles and responsibilities the concept of the child as a project and the consequential intensification of parenthood The book also explores transversal themes by outlining how reproduction and parenting are undertaken in Switzerland framed by the local cultural political and economic context including the gender system and resulting power relationships *CML Army Chemical Review ,2000*
