Animal Word Problems Starring Addition and Subtraction Rebecca Wingard-Nelson, 2009-01-01 Solve the mystery of addition and subtraction word problems Each word problem uses animal examples to make doing word problems fun Readers will learn four steps for solving any word problem how to read plan solve and check and more secrets for making word problems a breeze

Word Problems-Detailed Explanations of Reasoning and Solving Strategies Bill S. Lee, 2013-12 This is the answer key of Volume 8 of the entire set of 12 volumes of word problems solving strategies If you want to set a solid foundation in math grasping the techniques on solving word problems is the key to it This set of books teaches you the techniques and strategies you need to solve word problems Sample question in this volume A lion can live up to 40 years and an elephant can live twice as long If a sea turtle can live 20 years more than twice as long as the elephant how many years can the sea turtle live up to Reasoning and solution Twice 2 groups of so we can use the 3 elements formulas to solve for one of the elements An elephant can live twice as long as a lion 40 years so the number of years that a lion can live to is the amount in 1 group the number of groups is 2 We multiply the number of groups 2 with the amount in each group 40 years to find the total amount in the groups or the number of years that the elephant can live up to $2 \times 40 = 80$ years A sea turtle can live up to 20 years more than twice as long as the elephant We need to first find the amount that is twice as much as the elephant's age The amount in 1 group is the age of the elephant the number of groups is 2 Twice 2 groups of so we can use the 3 elements formulas to solve for one of the elements We multiply the number of groups 2 with the amount in each group 80 to find total amount in the groups $2 \times 80 = 160$ years Secondly we need to find 20 years more than twice as long as the elephant 160 years or 20 years more than 160 years We add 20 to 160 to find the number of years that the sea turtle can live up to $20 + 160 = 180$ years The techniques and strategies on using the addition and subtraction reasoning and the 3 elements formulas to solve decimal word problems on using algebra to solve word problems and on finding the measures of internal angles in triangles are also covered in this volume There is more in the volume than what is mentioned Detailed explanations of the reasoning and solving strategies for each and every problem in Volume 8 are given in this book

Word Problems-Detailed Explanations of Reasoning and Solving Strategies Bill S. Lee, 2013-12 This is the answer key of Volume 11 B of the entire set of 12 volumes of word problems solving strategies If you want to set a solid foundation in math grasping the techniques on solving word problems is the key to it This set of books teaches you the techniques and strategies you need to solve word problems Sample question in this volume Lily has 42 books If Hanna has $\frac{1}{6}$ more than Lily how many books does Hanna have Reasoning and solution Hanna has $\frac{1}{6}$ more than Lily the noun phrase after the word than is Lily so the number of books that Lily has is the amount in 1 or in $\frac{1}{6}$ or 1 whole Then Hanna's books are in what fractional part of 1 or 1 whole Attention $\frac{1}{6}$ is not an amount or a quantity but a fractional part Hanna has $\frac{1}{6}$ more than Lily means the number of books that Hanna has is in a fractional part that is $\frac{1}{6}$ more than the fractional part that Lily's books are in We know that

number of books that Lily has is in 1 so the fractional part that Hanna's books are in is $\frac{1}{6}$ more than $\frac{1}{1}$, $\frac{1}{6}$ more than $\frac{1}{1}$, $\frac{1}{6}$ more than $\frac{1}{1}$. $\frac{1}{6}$ so the number of books that Hanna has is in $\frac{7}{6}$. We multiply the fractional part $\frac{7}{6}$ with the amount in 1 the number of books that Lily has to find the amount in the fractional part the number of books that Hanna has $42 \times \frac{7}{6} = 49$ books. Hanna has 49 books.

The techniques and strategies on finding percent of increase and percent of decrease on using fractional parts only to solve a word problem and on using formulas to find the circumference and area of a circle. The volume teaches more than what is mentioned. Detailed explanations of the reasoning and solving strategies for each and every problem in Volume 11 B are given in the book.

Word Problems-Detailed Explanations of Reasoning and Solving Strategies Bill S.

Lee, 2013-12 This is the answer key of Volume 11 A of the entire set of 12 volumes of word problems solving strategies. If you want to set a solid foundation in math, grasping the techniques on solving word problems is the key to it. This set of books teaches you the techniques and strategies you need to solve word problems. Sample question in this volume: A book is 4.00. If it costs 2.5 as much as a pen, how much does the pen cost? Reasoning and solution: Another way to identify the amount in one whole is as the noun phrase after the second 'as' is considered the amount in 1 whole. From 'it costs 2.5 as much as a pen', a pen is the noun phrase after the second 'as', so the cost of a pen is considered as the amount in 1 whole. The fractional part is 2.5; the amount in the fractional part is 4.00, so we divide the fractional part 2.5 into the amount in it 4.00 to find the amount in 1 whole: $4.00 \div 2.5 = 1.60$. A pen costs 1.60. The techniques and strategies on finding the amount in each group, the number of groups, the total amount in all the groups, the amount in a fractional part, a fractional part, and the amount in 1 whole are reinforced in this volume. How to find a ratio, how to use ratios to solve word problems, find the answers in the volume, please. You are going to find more in this volume than what is already mentioned. Detailed explanations of the reasoning and solving strategies for each and every problem are given in this book. Word Problems for Model Drawing Solution Key (3-4) Jana M.
