

DNA Replication

Read the article DNA Polymerase – Keeping you cloned then annotate the diagram below showing the process of DNA replication.

Complete the following using the most appropriate words:

DNA replication involves the separation of the two _____ chains that make up the molecule. Firstly the double helix is opened up by an enzyme called _____. The points where the helix splits are called _____. To allow the helix to untwist without causing a tangled mess, one chain is broken by an enzyme called _____. One new strand of DNA is made by the enzyme known as _____ in a continuous process. On the other strand the enzyme works in the opposite direction making small sections of _____ DNA simultaneously. The sections are then joined together by the enzyme _____. Any incorrect paired bases are removed using the enzyme _____. As the new DNA contains half of the original DNA, the process is known as _____ replication.
