Improving the Clinical Effectiveness of Metagenomic Next Generation Sequencing (mNGS) in Infection Disease Diagnosis and Treatment: Linking the NGS Specialists and Clinicians, volume II Beiwen Zheng,2023-12-28 Timely and accurate pathogen diagnosis is critical for effective treatment outbreak prevention and precise antibiotics administration of infectious diseases which remains a challenge in clinical practice Metagenomic next generation sequencing mNGS allows researchers and laboratory specialists to analyze the mixed collection of sequencing reads in human clinical samples including sequences from bacteria viruses fungi and parasites besides the host This new technology shows great potential in pathogen diagnosis The sensitivity and faster turnaround time are higher than conventional clinical microbiology tests especially for fastidious and atypical pathogens However current mNGS based pathogen detection and diagnosis are facing challenges from both technical and practical aspects First sequencing noise can be introduced from different steps such as samples preparation sequencing data analysis and reporting algorithm Also the interpretation of the results such as detection limits and detection rates are not straightforward to clinicians compared with traditional culture based technologies Such challenges and considerations should be fully addressed before the wild application of mNGS as a pathogen detection tool Further these clarifications might help to properly find the best clinical application scenarios refine the medical treatments and improve the clinical effectiveness of mNGS in complex infectious diseases This Research Topic is focused on the application of mNGS

for infectious diseases diagnosis and treatment including experiment process and clinical usage Its purpose is to level up the clarification of NGS process to support the development of efficient experiment methods data interpretation algorithms and to report good examples of related clinical applications We hope this Research Topic could facilitate the discovery of novel methods and help NGS specialists and clinicians to know mutual concerns and work together to improve the clinical effectiveness of mNGS
