

Lab Report Format

Date:

Name:

Title

A whole page for a title is unnecessary and quite wasteful of paper. Put the title of your lab experiment at the top. Include your name, your group members' names, teacher's name, course and the date.

Purpose

Answer in a sentence or two, "what is the purpose of this experiment?"

Question

Write down a testable question, e.g. "How does string length affect the period of a pendulum?" or "What is the acceleration due to gravity in my school?"
The general format is "how does *independent variable* affect *dependent variable*?"

Hypothesis

Use the format "If...then...because". E.g. "If the length of the string increases, then the period of the pendulum will increase because the object has to travel farther".

Experimental Design

What are you going to do in the experiment? Explain briefly, in a few sentences, what is the generalized procedure. State the independent, dependent and controlled variables.

Materials

List any and all materials you will need for the experiment (NOT the materials you needed to build your launcher). Use the proper name and include the number if you need multiples.

Scientific Drawing

Include a one-page scientific drawing of your apparatus that includes your projectile launcher, measuring devices, etc.

Safety

How To Do A Proper Lab Report

Kathleen Armour

How To Do A Proper Lab Report:

How to Succeed at University--Canadian Edition Danton O'Day, Aldona Budniak, 2013-04 This self help guide takes students from the challenges of first year through to their successful graduation from university It contains essentially all of the information that a student needs for success It covers everything from attending lectures and taking effective notes to preparing for and writing tests and exams It is packed full of valuable advice and step by step approaches that will help every student attain the best marks possible It guides students through issues like effective listening writing reports and essays and tackling different types of test questions It gives advice on how to avoid problems and when they are unavoidable how to deal with them effectively Written by a professor with experience teaching at several universities and an MSc graduate who was awarded multiple scholarships there is insight and guidance in this volume that cannot be matched In addition to the University calendar and required textbooks this is the only complete guide a student will need to reach his or her full potential and to graduate with a degree of which they can be proud

How to Design and Report Experiments Andy Field, Graham Hole, 2002-12-20 How to Design and Report Experiments is the perfect textbook and guide to the often bewildering world of experimental design and statistics It provides a complete map of the entire process beginning with how to get ideas about research how to refine your research question and the actual design of the experiment leading on to statistical procedure and assistance with writing up of results While many books look at the fundamentals of doing successful experiments and include good coverage of statistical techniques this book very importantly considers the process in chronological order with specific attention given to effective design in the context of likely methods needed and expected results Without full assessment of these aspects the experience and results may not end up being as positive as one might have hoped Ample coverage is then also provided of statistical data analysis a hazardous journey in itself and the reporting of findings with numerous examples and helpful tips of common downfalls throughout Combining light humour empathy with solid practical guidance to ensure a positive experience overall How to Design and Report Experiments will be essential reading for students in psychology and those in cognate disciplines with an experimental focus or content in research methods courses

Crime Lab Report John M. Collins, 2019-09-17 Crime Lab Report compiles the most relevant and popular articles that appeared in this ongoing periodical between 2007 and 2017 Articles have been categorized by theme to serve as chapters with an introduction at the beginning of each chapter and a description of the events that inspired each article The author concludes the compilation with a reflection on Crime Lab Report the retired periodical and the future of forensic science as the 21st Century unfolds Intended for forensic scientists prosecutors defense attorneys and even students studying forensic science or law this compilation provides much needed information on the topics at hand Presents a comprehensive look behind the curtain of the forensic sciences from the viewpoint of someone working within the field Educates practitioners and laboratory administrators providing talking points to help them respond intelligently to questions and criticisms whether on the witness stand or when meeting with politicians and or policymakers Captures an important period in the history of forensic science and criminal justice in America

Help! I'm Teaching Middle School Science C. Jill Swango, Sally Boles Steward, 2003 Like your own personal survival guide Help! I'm Teaching Middle School Science is a nontechnical how to manual Especially for first year teachers But even veteran teachers can benefit from the plentiful ideas examples and tips on teaching science the way middle schoolers learn best The book covers all the basics what to do on the first day of school including icebreaker activities preparing safe and effective lab lessons managing the classroom working with in school teams as well as parents But its practical and encouraging approach doesn't mean it shortchanges the basics of effective pedagogy You'll learn how to handle cooperative learning and assessment how to help students write effectively and the importance of modeling for early adolescents

Doing Difference Differently Zhaozhe Wang, 2024-08-15 Doing Difference Differently ethnographically recounts the stories of four Chinese international students navigating the complex socio academic environment of a North American institution for higher education Zhaozhe Wang traces the ecologically situated and distributed literacy practices of these individuals across rhetorical contexts both on and off campus and reconstructs the digitally networked spatiotemporally emerging rhetorically potent and ecologically afforded literacy worlds of Chinese international students Doing Difference Differently provides an in depth nuanced understanding of the multifaceted literate lives of this often marginalized cultural group highlighting their diverse aspirations personas communities challenges and strategies The book reconceptualizes the linguistic and cultural differences of Chinese international students as active processes of embracing performing resisting negotiating and redefining the identities that

institutions impose on them through everyday literacy practices Wang offers an analytical heuristic for researchers and educators to better understand these students backgrounds and to more effectively and ethically support and advocate for them This case study critically engages broad and interconnected concepts that are essential to educators collective understanding of Generation Z students brought up in cultural and educational contexts outside of the European American sphere This book appeals to scholars researchers teachers and administrators working in North American higher education and English speaking countries particularly those in the fields of writing studies second language studies applied linguistics multilingual education literacy studies and international education Educators across disciplines seeking to better understand the growing population of Chinese international students in North America will likewise benefit
