How To Report A Tax Evader:

Tax Evasion and the Rule of Law in Latin America Marcelo Bergman, 2010-11-01 Few tasks are as crucial for the future of democracy in Latin America and indeed in other underdeveloped areas of the world as strengthening the rule of law and reforming the system of taxation In this book Marcelo Bergman shows how success in getting citizens to pay their taxes is related intimately to the social norms that undergird the rule of law The threat of legal sanctions is itself insufficient to motivate compliance he argues That kind of deterrence works best when citizens already have other reasons to want to comply based on their beliefs about what is fair and about how their fellow citizens are behaving The problem of free riding which arises when cheaters can count on enough suckers to pay their taxes so they can avoid doing so and still benefit from the government's supply of public goods cannot be reversed just by stringent law because the success of governmental enforcement ultimately depends on the social equilibrium that predominates in each country Culture and state effectiveness are inherently linked Using a wealth of new data drawn from his own multidimensional research involving game theory statistical models surveys and simulations Bergman compares Argentina and Chile to show how in two societies that otherwise share much in common the differing traditions of rule of law explain why so many citizens evade paying taxes in Argentina and why in Chile most citizens comply with the law In the concluding chapter he draws implications for public policy from the empirical findings and generalizes his argument to other societies in Africa Asia and Eastern Europe

Corporate Tax Evasion in a Globalized Environment Alexander Teepe, 2007-02-13 Inhaltsangabe Abstract There are only few results of empirical research about corporate tax evasion and avoidance in comparison to individual tax evasion One reason is a lack of exact data Moreover due to the nature of tax non compliance it is not easy to calculate its volume There is set of empirical questions on which we can make progress such as the determinants of corporate evasion for example the impact of penalties on corporate tax directors in large enterprises or the size of a company and the owner structure It is material for policymakers to know which characteristic of enterprises let us assume that a firm evades more or less and which circumstances enhance corporate tax evasion We suggest that the developments in a more globalized world may change incentives for non compliance of enterprises and change the options to evade taxes in particular for import or export firms The growing importance of transfer prices for tax directors of multinational enterprises may emphasize this assumption But not only large multinational enterprises have options to evade taxes Also smaller companies controlled by private owners can misstate import and export invoices in order to shift profits into low tax countries or tax haven countries or build up capital in the informal economy We analyze the existing basic theory and provide a critical discussion to it And we survey the existing empirical literature about corporate tax evasion Furthermore we present the results of a corporate tax survey in China and Germany By this survey related to import and export firms of all size evidence is provided that there are remarkable incentives to evade taxes by manipulation of commercial invoices We find that this type of tax evasion by

importers and exporters is basically determined by the same effects as corporate tax compliance in general but there are in addition specific effects on compliance such as effects by trading countries of the firms or by the supply chain Finally this paper presents various indications which imply the need of an international framework to analyze corporate tax compliance
