Fundamentals of Investments

Gordon J. Alexander, William F. Sharpe, Jeffery V. Bailey, 2001 This introduction provides a clear framework for understanding and analyzing securities and covers the major institutional features and theories of investing While the book presents a thorough discussion of investments the authors keep the material practical relevant and easy to understand The latest developments in investments are brought to life through the use of tables graphs and illustrations that incorporate current market information and academic research An international content deals directly with international securities and securities markets throughout the book along with currency management and interest rate parity Up to date Money Matters articles reflect the latest real world developments and are provided throughout each chapter to give readers a sense of how practitioners deal with various investment issues and use techniques Other coverage includes an array of investment tools presented through discussions on stocks bonds and other securities such as options and futures A guide to reviewing forecasting and monitoring for individuals preparing to make investments or take the CFA exam

Information Systems Architecture and Technology: Proceedings of 40th Anniversary International Conference on Information Systems Architecture and Technology - ISAT 2019 Zofia Wilimowska, Leszek Borzowski, Jerzy Świątek, 2019-09-04 This three

volume book highlights significant advances in the development of new information systems technologies and architectures. Further, it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data. Each chapter provides an analysis of a specific technical problem followed by a numerical analysis, simulation, and implementation of the solution to the real world problem.

Managing an organization, especially in today's rapidly changing environment, is a highly complex process. Increased competition in the marketplace, especially as a result of the massive and successful entry of foreign businesses into domestic markets, changes in consumer behaviour, and broader access to new technologies and information calls for organisational restructuring and the introduction and modification of management methods using the latest scientific advances. This situation has prompted various decision-making bodies to introduce computer modelling of organization management systems. This book presents the peer-reviewed proceedings of the 40th Anniversary International Conference Information Systems Architecture and Technology ISAT held on September 15-17, 2019, in Wrocław, Poland. The conference was organised by the Computer Science Department, Faculty of Computer Science and Management, Wrocław University of Sciences and Technology, and University of Applied Sciences in Nysa, Poland. The papers have been grouped into three major sections. Part I discusses topics including, but not limited to, artificial intelligence methods, knowledge discovery, and data mining; big data; knowledge-based management; Internet of Things; cloud computing; and high performance computing; distributed computer systems; content delivery networks; and service-oriented computing. Part II addresses various topics such as system modelling for control; recognition and decision support; mathematical modelling in computer system design; service-oriented systems; and cloud computing and complex process modelling. Part III focuses on a number of themes like knowledge-based management; modelling of financial and investment decisions; modelling of managerial decisions; production systems management; and maintenance risk management; small business management; and theories and models of innovation.
