conference in December 2009 revealed major flaws in the way the world's policymakers have attempted to prevent dangerous levels of increases in global temperatures. The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options including geo engineering, mitigation of CO₂, methane and black carbon, expanding forest research and development of low carbon energy and encouraging green technology transfer. For each policy, authors outline all of the costs, benefits and likely outcomes in fully referenced, clearly presented chapters accompanied by shorter critical alternative perspectives. To further stimulate debate, a panel of economists including three Nobel laureates evaluate and rank the attractiveness of the policies. This authoritative and thought provoking book will challenge readers to form their own conclusions about the best ways to respond to global warming. **Landslides and**

Climate Change: Challenges and Solutions Robin McInnes, Jenny Jakeways, Helen Fairbank, Emma Mathie, 2007-05-10

Understanding the relationship between landslides and climate change is crucially important in planning a proactive approach to hazard and risk management. Advances in geohazard modelling and prediction enable us to be better prepared for the impacts of climate change but there is still a need for effective risk management and informed planning. **Global**

Crises, Global Solutions Bjørn Lomborg, 2009-07-09 In this book leading economists evaluate how the world can best spend money to combat the world's biggest problems. *Security Cooperation in the Pacific Islands* Joanne Wallis, Henrietta

McNeill, James Batley, Anna Powles, 2025-03-20 Wallis, McNeill, Batley, Powles and the contributors examine the dynamics of Pacific Islands security cooperation, analysing how it helps address regional security challenges amid the broader strategic competition between China and the United States that is increasingly playing out in the region. Pacific Island countries do not want to become pawns in this competition but its impacts are inescapable and are creating additional security challenges. Compounding these effects are climate change and COVID-19, both of which have intersected with existing traditional and non-traditional security challenges facing the region. In response, Pacific Island leaders have vowed to pursue greater security cooperation amongst themselves and with partner states. This book addresses partner states' interests in the region, how these interests and Pacific priorities align and, if not, what the possible consequences may be. It also analyses successful areas of security cooperation and tackles how challenges may be improved. Incorporating a range of perspectives from key leaders, practitioners and scholars, this is an empirically grounded analysis of security cooperation within the Pacific Islands region and by the region's major partners. A vital resource for researchers and practitioners seeking to better understand Pacific Islands security collaboration and the inherent challenges it faces.
