Subverting Consumerism Robert Crocker, Keri Chiveralls, 2018-07-24 There is now a widespread interest in reuse in many domains from opera houses built over old warehouses to vintage clothes and everyday goods incorporating repurposed materials or parts Despite its ubiquity this extensive creative work is typically seen in narrowly environmental terms as a means of reducing carbon resource use or waste However as this volume shows reuse also has aesthetic and cultural dimensions and a rich social currency invoked to consciously subvert the accelerated consumer culture responsible for our unfolding environmental crisis In three parts the essays in this book consider reuse in terms of values aesthetics and meaning its application in contemporary urban and spatial settings and the revival of social practices involving a more conscious recourse to reuse and repair These are bookended by the editors essays the first on the significant relationship between reuse and technological and social acceleration evident in the surrounding consumer society and the last on the multiple forms of reuse deployed in a contemporary alternative building practice and their contributions to presenting alternative ways of living in the world Challenging dominant understandings of waste and consumption Subverting Consumerism shows how reuse has become a means for many to creatively engage with the past and to discover a continuity and sense of place eroded by the accelerative regimes of contemporary consumerism Becoming a means of resistance and offering a range of aesthetic social and economic possibilities reuse can be found to subvert and challenge the obsessive quest for the new found in contemporary consumerism

Integrating health in urban and territorial planning World Health Organization, United Nations Human Settlements Programme, 2020-05-08

Good practices for integrating gender equality and women's empowerment in climate-smart agriculture programmes Food and Agriculture Organization of the United Nations, 2019-05-31 This guidance entitled Integrating Gender Equality and Women's Empowerment in CSA Programs focuses on a set of agricultural practices to be implemented by small scale food producers in developing countries The purpose of this document is to provide agriculture development practitioners and policy makers globally with guidance tools and examples of successful integration of gender equality and women's empowerment GEWE into climate smart agriculture CSA work by demonstrating the necessity and benefits of incorporating a GEWE approach in CSA work and presenting tested strategies for enhancing the engagement of women and particularly vulnerable groups in CSA work With a view towards accelerating the impacts of country programs FAO and CARE have partnered to develop this guidance to help policy makers and practitioners meet the ambitious goals of the SDGs and the 2030 Agenda

Rewilding in Practice Ian Convery, Steve Carver, Monica T. Engel, Sally Hawkins, Rene Beyers, Yue Cao, 2025-03-03 Rewilding is a long term and large scale process which works to restore degraded ecosystems or social ecological systems to the point that they are resilient and self sustaining and therefore requiring little in terms of conservation management Rewilding practice focuses on re-establishing ecological processes

including trophic levels that were lost mainly due to anthropogenic disturbance It also aims to affect a paradigm shift in human nature relationships with intentions to better understand the interdependencies between humans and nature so that people can appreciate and accommodate nature in their landscapes and make more informed and sustainable decisions about how we live In this sense rewilding has real transformational potential *Understanding Vineyard Soils* Robert E.

White,2015-02-04 The first edition of *Understanding Vineyard Soils* has been praised for its comprehensive coverage of soil topics relevant to viticulture However the industry is dynamic new developments are occurring especially with respect to measuring soil variability managing soil water possible effects of climate change rootstock breeding and selection monitoring sustainability and improving grape quality and the typicity of wines All this is embodied in an increased focus on the terroir or sense of place of vineyard sites with greater emphasis being placed on wine quality relative to quantity in an increasingly competitive world market The promotion of organic and biodynamic practices has raised a general awareness of soil health which is often associated with a soil s biology but which to be properly assessed must be focused on a soil s physical chemical and biological properties This edition of White s influential book presents the latest updates on these and other developments in soil management in vineyards With a minimum of scientific jargon *Understanding Vineyard Soils* explains the interaction between soils on a variety of parent materials around the world and grapevine growth and wine typicity The essential chemical and physical processes involving nutrients water oxygen and carbon dioxide moderated by the activities of soil organisms are discussed Methods are proposed for alleviating adverse conditions such as soil acidity sodicity compaction poor drainage and salinity The pros and cons of organic viticulture are debated as are the possible effects of climate change The author explains how sustainable wine production requires winegrowers to take care of the soil and minimize their impact on the environment This book is a practical guide for winegrowers and the lay reader who is seeking general information about soils but who may also wish to pursue in more depth the influence of different soil types on vine performance and wine character **Adaptive Agricultural Practices** Pradeep Kumar Dubey,Gopal Shankar Singh,Purushothaman Chirakkuzhyil

Abhilash,2019-05-16 This brief explores several adaptive agricultural practices from around the world to fulfill current and future agricultural demands for food security due to the challenges posed by climate change and growing global population Readers will discover how farmers adapt to environmental changes by adopting various agronomic practices at crop farm and landscape levels Particular attention is given to systemic and transformational adaptation strategies employed by farmers such as mulching organic farming and crop diversification This is a highly informative and carefully presented book that provides insights on how crops can build up resilience against periods of drought high salinity disasters such as floods and diseases The policy implications and future prospects of these adaptation strategies are also addressed Environmental and plant scientists agronomists and researchers in climate sciences will find this book interesting **Green Savings** Marilyn A. Brown,Yu Wang,2015-09-29 This landmark work lauds the benefits of decreased energy consumption investigating its

relationship to public policy and analyzing its potential billion dollar benefits to the U S economy U S consumers tend to use energy indiscriminately something they may no longer be able to do with impunity This game changing book asserts that reducing energy consumption should be a frontline strategy to address global climate change threats to energy security and the challenge of grid reliability The book supports two bold arguments that policies motivating greater investment in high energy efficiency should be a priority and that energy efficiency can help the nation in times of crisis To make their case for the necessity of prioritizing demand reduction the authors examine the policies and markets operating in a number of leading cities states and nations across the globe to uncover the keys to their success These examples show how demand side strategies can significantly reduce pollution cut costs and make the electric grid more resilient The authors explain why these technologies are not widely adopted and assess the potential savings they can produce The book will be an eye opener for policymakers energy professionals and the public as it demonstrates how cost effective demand reduction policies can improve air quality strengthen electricity markets and generate jobs

National Forest Inventories of Latin America and the Caribbean Ramírez, C., Alberdi, I., Bahamondez, C., Freitas, J., 2022-06-24 National forest inventories NFIs are one of the main sources of forest information This book describes the importance and history of NFIs in Latin America and the Caribbean a region that is particularly relevant due to the extension and biodiversity of its forests Methodologies for data collection and measurement of the most relevant indicators in 21 countries are addressed In addition similarities and differences in IFN designs challenges and opportunities and prospects for the future are examined This analysis demonstrates that the information generated by the countries is diverse and must be harmonized to meet the commitments and opportunities for sustainable forest management in the 21st century This publication represents a milestone in the beginning of the harmonization process towards data transparency within the forestry sector in Latin America and the Caribbean and constitutes the first collaborative effort of a network of NFI experts and collaborators in the region

Prosperity without Growth Tim Jackson, 2016-12-08 What can prosperity possibly mean in a world of environmental and social limits The publication of Prosperity without Growth was a landmark in the sustainability debate Tim Jackson s piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike the continued pursuit of exponential economic growth Its findings provoked controversy inspired debate and led to a new wave of research building on its arguments and conclusions This substantially revised and re written edition updates those arguments and considerably expands upon them Jackson demonstrates that building a post growth economy is a precise definable and meaningful task Starting from clear first principles he sets out the dimensions of that task the nature of enterprise the quality of our working lives the structure of investment and the role of the money supply He shows how the economy of tomorrow may be transformed in ways that protect employment facilitate social investment reduce inequality and deliver both ecological and financial stability Seven years after it was first published Prosperity without Growth is no longer a

radical narrative whispered by a marginal fringe but an essential vision of social progress in a post crisis world Fulfilling that vision is simply the most urgent task of our times

On-Farm Implementation of Transformative Technologies and Practices for Sustainability Transitions in Agriculture Callum Eastwood,Julie Ingram,Alan Renwick, Simon Fielke,Paul Edwards, Margaret Ayre,2025-05-21 There is increased pressure on agri food sectors globally to transition to more sustainable food systems This is a response to ongoing challenges associated with environmental impacts food security workplace attractiveness changing knowledge and advisory systems farmer well being and technological change Transformative technology and practices advocated by scholars and policy makers include digitalization and automation agroecological systems diversification de intensification local food systems circularity transformative value chains and land use change These changed practices ultimately need to be implemented at a farm scale but the implications will ripple through regional and global food systems The potential role of transformative agricultural technologies and practices in sustainability transitions is widely researched However greater focus is required on the real world implications at a farm system level and the positive and negative effects of change in the livelihoods of those being urged to change i e farmers farm businesses and supply chains At the farm level transformation can be a complex process that intersects land livelihoods and security of the wider food supply system As a consequence theoretical concepts of transformation to achieve more sustainable food systems can be difficult to implement for farmers due to unforeseen interactions and implications Better understanding of these experiences is needed for effective and viable transformation options to progress environmental social and economic sustainability
