

You must grease the machine regularly to keep it working efficiently. Regular greasing will also lengthen the machine's working life.

Greasing should be done with a grease gun. Normally, two strokes of the gun should be enough. Stop greasing when fresh grease appears at the joint.

**WARNING**

You will be working close into the machine for these jobs. Lower the attachments if possible. Remove the starter key. This will prevent the engine being started.

43-1-3

For the types of grease to use at each point see the **Lubricants and Capacities** chart.

Do not mix different types of grease, keep them separate.

Note: Some optional attachments may need greasing more often. See **Section A - ATTACHMENTS**.
