Modular in design, the MTS-6000 offers an extensive portfolio of test functionality with over forty different fiber modules supporting a wide range of applications. The versatility of the MTS-6000 allows technicians to standardize using one type of test equipment and then introduce new testing capabilities in the field without incurring additional costs.

Since the MTS-6000 is compatible with our existing fiber module product line, technicians can exchange plug-in modules between the MTS-8000 Multiple Network Test Platform and the MTS-6000, in the field and without the need for additional tools. To ensure the highest level of return on your test equipment capital investment, existing OTDR modules from the MTS-5100 can be transformed (with an extension) for use with the MTS-6000.
