A Political History of Big Science Katharina C. Cramer, 2020-08-31 This book investigates the political history of Big Science in Europe in the late twentieth century and the early twenty first century characterised by the founding histories of two collaborative single sited facilities namely the European Synchrotron Radiation Facility ESRF in Grenoble France and the European X Ray Free Electron Laser European XFEL in Schenefeld Germany Under the heading of the other Europe this book presents the history and politics of European Big Science as an alternative road to Western European integration besides the mainstream political integration process of the European Economic Community and the European Union It shows that Big Science has a role to play in European politics and policymaking and that the crucial and unavoidable symbiosis between science technology and politics brings the creation of Big Science projects back to geopolitical realities

Political Survivors Emma Kuby, 2019-03-15 In 1949 as Cold War tensions in Europe mounted French intellectual and former Buchenwald inmate David Rousset called upon fellow concentration camp survivors to denounce the Soviet Gulag as a hallucinatory repetition of Nazi Germany's most terrible crime In *Political Survivors* Emma Kuby tells the riveting story of what followed his appeal as prominent members of the wartime Resistance from throughout Western Europe united to campaign against the continued existence of inhumane internment systems around the world The International Commission against the Concentration Camp Regime brought together those originally deported for acts of anti Nazi political activity who believed that their unlikely survival incurred a duty to bear witness for other victims Over the course of the next decade these pioneering activists crusaded to expose political imprisonment forced labor and other crimes against humanity in Franco's Spain Maoist China French Algeria and beyond Until now the CIA's secret funding of Rousset's movement has remained in the shadows Kuby reveals this clandestine arrangement between European camp survivors and American intelligence agents She also brings to light how Jewish Holocaust victims were systematically excluded from Commission membership a choice that fueled the group's rise but also helped lead to its premature downfall The history that she unearths provides a striking new vision of how wartime memory shaped European intellectual life and ideological struggle after 1945 showing that the key lessons Western Europeans drew from the war centered on the camp imagined first

and foremost as a site of political repression rather than ethnic genocide Political Survivors argues that Cold War dogma and acrimony tied to a distorted understanding of WWII s chief atrocities overshadowed the humanitarian possibilities of the nascent anti concentration camp movement as Europe confronted the violent decolonizing struggles of the 1950s **The War and Its Shadow** Helen Graham,2012 In Spain today the civil war remains the past that will not pass away The author explores the origins nature and long term consequences of this exterminatory war in Spain charting the resonant forms of political social and cultural resistance to it and the memory legacy these have left behind in Europe and beyond *Soft Law in International Trade Finance* Agatha Brandão de Oliveira,Lauro Gama,Geneviève Saumier,2024-10-14 Expert contributors to this volume offer a comprehensive exploration of the UCP 600 s impact on international trade finance law examining the dynamic interplay between soft law and legal harmonization in 28 jurisdictions across all continents With a rich array of case studies and insightful analysis this book provides a nuanced interpretation of how soft law shapes global commerce Its diverse perspectives and practical insights make it essential reading for practitioners and scholars seeking a deeper understanding of the real world implications of soft law in trade Living Together European Centre for Modern Languages,2001-01-01 The European Centre for Modern Languages ECML works to promote innovations in the teaching and learning of modern languages This volume contains the proceedings of the third international colloquy which was attended by experts from over 30 countries and was organised in co operation with the European Commission s Directorate General for Education and Culture **Report** Canada. Unemployment Insurance Commission,1961 **Male Bodies Unmade** Jongwoo Jeremy Kim,2023-11-14 Male Bodies Unmade explores white men s disunified physicality in modern and contemporary art while attending to erotic polysemy that questions the visual ethos of Occidental patriarchy Art historian Jongwoo Jeremy Kim s approach is informed by his own status as an immigrant a polyglot queen drawn to extravagant fantasies of misbehaving bodies that are in truth foreign territories colonies of misbelief In six case studies focusing on configurations of irrational anatomy and horny self extinction this book celebrates the lessons and pleasures of disrupting art history s hegemonically Western narratives *Decolonizing 1968* Burleigh Hendrickson,2022-11-15 Decolonizing 1968 explores how activists in 1968 transformed university campuses across Europe and North Africa into sites of contestation where students administrators and state officials collided over definitions of modernity and nationhood after empire Burleigh Hendrickson details protesters versions of events to counterbalance more visible narratives that emerged from state controlled media centers and ultimately describes how the very education systems put in place to serve the French state during the colonial period ended up functioning as the crucible of postcolonial revolt Hendrickson not only unearths complex connections among activists and their transnational networks across Tunis Paris and Dakar but also weaves together their overlapping stories and participation in France s May 68 Using global protest to demonstrate the enduring links between France and its former colonies Decolonizing 1968 traces the historical relationships between colonialism and 1968 activism

examining transnational networks that emerged and new human and immigrants rights initiatives that directly followed As a result Hendrickson reveals that 1968 is not merely a flashpoint in the history of left wing protest but a key turning point in the history of decolonization Thanks to generous funding from Penn State and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories
