Hart, T.J. Pitcher, 2012-12-06 The African lakes are an extremely important ecosystem and the subject of much study relating to species introductions and loss of biodiversity This book provides a thorough review of the whole subject and will be of great interest to fish biologists fisheries workers ecologists environmental scientists and conservationists **Report** United States. Superintendent of Documents, 1896 **Fishing the Great Lakes** Margaret Beattie Bogue, 2001-06-28 Fishing the Great Lakes is a sweeping history of the destruction of the once abundant fisheries of the great inland seas that lie between the United States and Canada Though lake trout whitefish freshwater herring and sturgeon were still teeming as late as 1850 Margaret Bogue documents here how overfishing pollution political squabbling poor public policies and commercial exploitation combined to damage the fish populations even before the voracious sea lamprey invaded the lakes and decimated the lake trout population in the 1940s From the earliest records of fishing by native peoples through the era of European exploration and settlement to the growth and collapse of the commercial fishing industry Fishing the Great Lakes traces the changing relationships between the fish resources and the people of the Great Lakes region Bogue focuses in particular on the period from 1783 when Great Britain and the United States first politically severed the geographic unity of the Great Lakes through 1933 when the commercial fishing industry had passed from its heyday in the late nineteenth century into very serious decline She shows how fishermen entrepreneurial fish dealers the monopolistic A Booth and Company which distributed and marketed much of the Great Lakes catch and policy makers at all levels of government played their parts in the debacle So too did underfunded scientists and early conservationists unable to spark the interest of an indifferent public Concern with the quality of lake habitat and the

abundance of fish increasingly took a backseat to the interests of agriculture lumbering mining commerce manufacturing and urban development in the Great Lakes region Offering more than a regional history Bogue also places the problems of Great Lakes fishing in the context of past and current worldwide fishery concerns **General Technical Report RM.** ,1990

Canadians and politicians have a common responsibility to learn from the mistakes inherited from a colonialist legacy and to not repeat the wrongs corruption and injustices our people suffered in the hands of government officials politicians and their oppressive laws Reading and learning from Cheated would be a good place to start reconciliation and reparation Ovide Mercredi former National Chief of the Assembly of First Nations The story of how Laurier Liberals took hold of the Department of Indian Affairs in 1896 and transformed it into a machine for expropriating Indigenous land You won t find the Ocean Man and Pheasant Rump reserves on a map of southeastern Saskatchewan In 1901 the two Nakoda bands reluctantly surrendered the 70 square miles granted to them under treaty It s just one of more than two dozen surrenders aggressively pursued by the Laurier Liberal government over a fifteen year period One in five acres was taken from First Nations This confiscation was justified on the grounds that prairie bands had too much land and that it would be better used by white settlers In reality the surrendered land was largely scooped up by Liberal speculators including three senior civil servants and a Liberal cabinet minister and flipped for a tidy profit None were held to account Cheated is a gripping story of single minded politicians uncompromising Indian Affairs officials grasping government appointees and well connected Liberal speculators set against a backdrop of politics power patronage and profit The Laurier government s settlement of western Canada can never be looked at the same way again
