Logged On Smart Government Solutions From South Asia:

Logged On Zubair K. Bhatti, Jody Zall Kusek, Tony Verheijen, 2014-10-27 *Logged On* offers a new mobile technology model and five solutions that can improve citizens interactions with a more effective and efficient government. The book presents a number of examples from around the world but focuses on South Asia countries some of the most challenging in the world.

Beyond Smart and Connected Governments J. Ramon Gil-Garcia, Theresa A. Pardo, Mila Gasco-Hernandez, 2020-03-06 This book provides a comprehensive introduction to the study of sensors and the Internet of Things IoT from a government and public policy perspective. Since 2011 federal spending on IoT has been growing at a compound annual rate of ten percent. New technologies such as sensors and new kinds of data such as big data are creating new ways to systematically capture data and to use it to respond to complex problems. Some of these new technologies and applications have been identified and studied in recent literature in terms of their relevance to government. This volume adds to the literature by presenting sound theories and concepts for understanding the opportunities and challenges governments face when seeking to improve public services and government operations through the use of IoT. It also includes innovative methodologies for building understanding of the potential of a smart and connected government. In addition, the book offers relevant case studies and practical recommendations for the development, management and evaluation of public policies and government programs.

Labour Law and the Gig Economy Jo Carby-Hall, Lourdes Mella Méndez, 2020-03-24 This international book analyses the impact of digitisation in labour markets on labour relationships and also on labour processes. The rapid progress of modern disruptive technologies and AIs and their multiple applications to each phase of the labour production system are changing the production rules on a global scale with significant impacts in every aspect of work. As new technologies transform work patterns and change the type of jobs available, destroying some while creating others and even the nature of the tasks performed, numerous legal problems arise which are challenging to legislators and legal scholars who need to find appropriate solutions to them. Considering the labour law issues which have been created by technological developments and currently affect the work of millions worldwide, this book highlights the full scope of these issues, suggesting solutions to emerging problems and ways to mitigate the risks brought about through technological advancement. Approaching the present debate with perspectives on legal problems with expertise from a wide range of different countries, this book presents informed and scholarly studies which answer the challenges that new technologies present in labour markets, private lives and labour processes.

Enabling Sustainable Energy Transitions

Siddharth Sareen, 2019-10-16 This open access book reframes sustainable energy transitions as being a matter of resolving accountability crises It demonstrates how the empirical study of several practices of legitimization can analytically deconstruct energy transitions and presents a typology of these practices to help determine whether energy transitions contribute to sustainability The real world challenge of climate change requires sustainable energy transitions This presents a crisis of accountability legitimated through situated practices in a wide range of cases including solar energy transitions in Portugal urban energy transitions in Germany forestland conflicts in Indonesia urban carbon emission targets in Norway transport electrification in the Nordic region and biodiversity conservation and energy extraction in the USA By synthesising these cases chapters identify various dimensions wherein

practices of legitimation construct specific accountability relations This book deftly illustrates the value of an analytical approach focused on accountable governance to enable sustainable energy transitions It will be of great use to both academics and practitioners working in the field of energy transitions *Monthly Catalogue, United States Public Documents* ,1987 **Who Owns Whom** ,2008 *Oxbridge Directory of Newsletters* ,2001
