C. Paseau,2022-05-12 Logical monism is the claim that there is a single correct logic the one true logic of our title The view has evident appeal as it reflects assumptions made in ordinary reasoning as well as in mathematics the sciences and the law In all these spheres we tend to believe that there are determinate facts about the validity of arguments Despite its evident appeal however logical monism must meet two challenges The first is the challenge from logical pluralism according to which there is more than one correct logic The second challenge is to determine which form of logical monism is the correct one One True Logic is the first monograph to explicitly articulate a version of logical monism and defend it against the first challenge It provides a critical overview of the monism vs pluralism debate and argues for the former It also responds to the second challenge by defending a particular monism based on a highly infinitary logic It breaks new ground on a number of fronts and unifies disparate discussions in the philosophical and logical literature In particular it generalises the Tarski Sher criterion of logicity provides a novel defence of this generalisation offers a clear new argument for the logicity of infinitary logic and replies to recent pluralist arguments **The Personal Government of Charles I.
