The Private Sector and Organized Crime Yuliya

Zabyelina, Kimberley L. Thachuk, 2022-09-02 This book contributes to the literature on organized crime by providing a detailed account of the various nuances of what happens when criminal organizations misuse or penetrate legitimate businesses. It advances the existing scholarship on attacks, infiltration and capture of legal businesses by organized crime and sheds light on the important role the private sector can play to fight back. It considers a range of industries from bars and restaurants to labour intensive enterprises such as construction and waste management to sectors susceptible to illicit activities including transportation, wholesale and retail trade and businesses controlled by fragmented legislation such as gambling. Organized criminal groups capitalize on legitimate businesses beleaguered by economic downturns, government regulations, natural disasters, societal conflict and the COVID 19 pandemic. To survive, some private companies have even become the willing partners of criminal organizations. Thus the relationships between licit businesses and organized crime are highly varied and can range from victimization of businesses to willing collusion and even exploitation of organized crime by the private sector, albeit with arrangements that typically allow plausible deniability. In other words, these relationships are highly diverse and create a complex reality which is the focus of the articles presented here. This book will appeal to students, academics and policy practitioners with an interest in organized crime. It will also provide important supplementary reading for undergraduate and graduate courses on topics such as transnational security issues, transnational organized crime, international criminal justice, criminal finance, non state actors, international affairs, comparative politics and economics and business courses.

Combatting Illicit Trade in Tobacco Products Stanisław Tosza, John A. E. Vervaele, 2022-02-17 This book focuses on the enforcement aspect of tobacco control policy and argues that the intense regulation of the tobacco market will never be successful as long as it can be circumvented by the availability of illicit tobacco products. Yet current efforts to combat illicit tobacco trade are insufficient, suffering from several flaws and gaps at the regulatory and operational levels. The aim of this book is to provide an analysis of the legal framework and practice of enforcement with regard to illicit tobacco products. Combining criminological and legal perspectives, it presents and critically analyses the phenomenon of illicit tobacco trade as well as the policies, legal frameworks and practices in six EU countries with regard to combatting this phenomenon, assessing the strengths and weaknesses of their approaches. Furthermore, it studies the relationship between the EU and third countries, e.g. Ukraine, in terms of how the EU can influence policy and enforcement in these countries in order to counter illicit tobacco trafficking. Not exclusively focusing on the EU, the book also includes an analysis of enforcement against illicit tobacco products in the US. The EU Member States analysed in the book, Belgium, Germany, Italy, Latvia, the Netherlands and Poland, reflect the range of currently available approaches. Some of them have ratified the WHO Protocol against tobacco smuggling; others have not. They belong to different legal traditions and face different challenges due to their respective border situations. While Belgium and the Netherlands are key entry ports to the EU, Poland and Latvia

represent the Eastern land border of the EU with various regional challenges Italy has a long maritime border where trafficking is possible from Northern Africa and from the Middle East It also has significant experience in fighting organised crime Lastly Germany is the largest market in Europe and situated in the middle of these trafficking routes
