Culinary Discourses in Asian-Australian Writing Astrid Schwegler-Castañer, 2025-03-24 Besides nourishing us food can be used metaphorically to help us understand the complex and abstract concepts through which we negotiate our position in the world we talk about digesting ideas ruminating on a problem or swallowing an insult Building on this premise the book offers a detailed analysis of culinary imagery in twenty first century works from Asian Australian authors like Hsu Ming Teo Alice Pung Simone Lazaroo and Shaun Tan Food is used to embody the abstractions that underlie racial inequalities and conflicts questioning the

superficiality of Australia's official multiculturalism and its reproduction of racial and cultural privileges At the same time the analysis highlights the power of these fictional narratives to envision alternative worlds in the hope of gaining common ground for human understanding and solidarity *Oswaal CBSE Sample Question Papers Class 9 Mathematics Book (For 2024 Exam)* | 2023-24 Oswaal Editorial Board,2023-09-14 Description of the product Fresh Relevant with 2024 CBSE SQP Fully Solved Analysed Score Boosting Insights with 500 Questions 1000 Concepts Insider Tips Techniques with On Tips Notes Mind Maps Mnemonics Exam Ready to Practice with 10 Highly Probable SQPs with Actual Board Answer sheets

mechanisms are up to the task This collection of essays edited by two leading regulatory governance scholars offers a critical exploration of algorithmic regulation understood both as a means for co ordinating and regulating social action and decision making as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated It offers a unique perspective that is likely to become a significant reference point for the ever growing debates about the power of algorithms in daily life in the worlds of research policy and practice The range of contributors are drawn from a broad range of disciplinary perspectives including law public administration applied philosophy data science and artificial intelligence Taken together they highlight the rise of algorithmic power the potential benefits and risks associated with this power the way in which Sheila Jasanoff s long standing claim that technology is politics has been thrown into sharp relief by the speed and scale at which algorithmic systems are proliferating and the urgent need for wider public debate and engagement of their underlying values and value trade offs the way in which they affect individual and collective decision making and action and effective and legitimate mechanisms by and through which algorithmic power is held to account
