The Instability of Truth Rebecca Lemov,2025-03-25 An acclaimed historian of science uncovers the hidden history of brainwashing and its troubling implications for today Because brainwashing affects both the world and our observation of the world we often don t recognize it while it s happening unless we know where to look As Rebecca Lemov writes in The Instability of Truth Brainwashing erases itself What we call brainwashing is more common than we think it is not so much what happens to other people as what can happen to anyone The Instability of Truth exposes the myriad ways our minds can be controlled against our will from the brainwashing techniques used against American POWs in North Korea to the soft brainwashing of social media doomscrolling and behavior shaping In our increasingly data driven world anyone can fall victim to mind control Lemov identifies invasive forms of emotional engineering that exploit trauma and addiction to coerce

and persuade in everyday life Tracing the word brainwashing from deep in the files of an operative of the U S Office of Strategic Services in the 1950s to the pioneering research of Robert Jay Lifton to the public trials of cult leaders and the case of Patty Hearst Lemov also studies how the idea of mind control has spread across the globe and penetrated courtrooms secret labs military schools and today s digital sites The Instability of Truth offers lessons from mind control episodes past and present Truth is always subject to question in more mundane walks of life than most people believe and Lemov equips us for the increasing challenges we face from social media AI and an unprecedented global form of surveillance capitalism The Instability of Truth develops a rigorous new understanding of both brainwashing s paradoxes and its emotional roots by giving voice to brainwashers the brainwashed and third party observers alike

Urgency in the Anthropocene Amanda H. Lynch,Siri Veland,2018-11-20 A proposal to reframe the Anthropocene as an age of actual and emerging coexistence with earth system variability encompassing both human dignity and environmental sustainability Is this the Anthropocene the age in which humans have become a geological force leaving indelible signs of their activities on the earth The narrative of the Anthropocene so far is characterized by extremes emergencies and exceptions a tale of apocalypse by our own hands The sense of ongoing crisis emboldens policy and governance responses that challenge established systems of sovereignty and law The once unacceptable geoengineering technology for example or authoritarian decision making are now anticipated and even demanded by some To counter this Amanda Lynch and Siri Veland propose a reframing of the Anthropocene seeing it not as a race against catastrophe but as an age of emerging coexistence with earth system variability Lynch and Veland examine the interplay between our new state of ostensible urgency and the means by which this urgency is identified and addressed They examine how societies including Indigenous societies have understood such interplays explore

how extreme weather and climate weave into the Anthropocene narrative consider the tension between the short time scale of disasters and the longer time scale of sustainability and discuss both international and national approaches to Anthropocene governance Finally they argue for an Anthropocene of coexistence that embraces both human dignity and sustainability
