Reference Guide for Medicare Physician & Supplier Billers, 2004 *Essential Health Benefits* Institute of Medicine, Board on Health Care Services, Committee on Defining and Revising an Essential Health Benefits Package for Qualified Health Plans, 2012-02-17 In 2010 an estimated 50 million people were uninsured in the United States A portion of the uninsured reflects unemployment rates however this rate is primarily a reflection of the fact that when most health plans meet an individual's needs most times those health plans are not affordable Research shows that people without health insurance are more likely to experience financial burdens associated with the utilization of health care services But even among the insured underinsurance has emerged as a barrier to care The Patient Protection and Affordable Care Act ACA has made the most comprehensive changes to the provision of health insurance since the development of Medicare and Medicaid by requiring all Americans to have health insurance by 2016 An estimated 30 million individuals who would otherwise be uninsured are expected to obtain insurance through the private health insurance market or state expansion of Medicaid programs The success of the ACA depends on the design of the essential health benefits EHB package and its affordability Essential Health Benefits recommends a process for defining monitoring and updating the EHB package
