Curing Medicare Andy Lazris,2016-05-19 Andy Lazris MD is a practicing primary care physician who experiences the effects of Medicare policy on a daily basis As a result he believes that the way we care for our elderly has taken a wrong turn and that Medicare is complicit in creating the very problems it seeks to solve Aging is not a disease to be cured it is a life stage to be lived Lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life Unfortunately Medicare s payment structure and rules deprive the elderly of the chance to pursue less aggressive care which often yields the most humane and effective results Medicare encourages and will pay more readily for hospitalization than for palliative and home care It encourages and pays for high tech assaults on disease rather than for the primary care that can make a real difference in the lives of the elderly Lazris offers straightforward solutions to ensure Medicare s solvency through sensible cost effective plans that do not restrict patient choice or negate the doctor patient relationship Using both data and personal stories he shows how Medicare needs to change in structure and purpose as the population ages the physician pool becomes more specialized and new medical technology becomes available *Curing Medicare* demonstrates which medical interventions medicines tests procedures work and which can be harmful in many common conditions in the elderly the harms and benefits of hospitalization the current culture of long term care and how Medicare often promotes care that is ineffective expensive and contrary to what many elderly patients and their families really want *Cognitive Aging* Institute of Medicine,Board on Health Sciences Policy,Committee on the Public Health Dimensions of Cognitive Aging,2015-07-21 For most Americans staying mentally sharp as they age is a very high priority Declines in memory and decision making abilities may trigger fears of Alzheimer s disease or other neurodegenerative diseases However cognitive aging is a natural process that can have both positive and negative effects on cognitive function in older adults effects that vary widely among individuals At this point in time when the older population is rapidly growing in
