Exploring data

Section 1: Introduction

Notes and Examples

These notes have sub-sections on:

- Looking at data
- Stem-and-leaf diagrams
- Types of data
- Measures of central tendency
- Comparison of measures of central tendency

Looking at data

Most of the ideas introduced in the "Looking at the data" section of the textbook are familiar from GCSE; however some of the terminology may be new to you. Make sure that you know what is meant by the terms:

- outlier
- unimodal distribution
- bimodal distribution
- symmetrical distribution
- uniform distribution
- positive skew
- negative skew

(see the glossary if you need to)

Stem-and-leaf diagrams

The problem with grouping data is that the raw data is lost – all you know is the class each item of data lies in. A stem-and-leaf diagram groups the data but keeps the raw data intact.

This data set is the heights of a group of 20 'A' level students.

The stems are 16, 17, 18, 19. The second decimal places are used as the leaves.
